BOWERS AND RUDDY  
GALLERIES, INC.

PUBLIC AUCTION SALE  
SEPTEMBER 22-24, 1981

PART I

Bowers & Ruddy  
is a dynamic,  
growing company.  
Our professional  
services are  
expanding and we  
have moved to ex-  
panded facilities  
on Wilshire  
Boulevard in Los  
Angeles. To  
dramatize these  
changes and yet  
honor the tradi-  
tions and prin-  
ciples of our com-  
pany, we have in-  
troduced a new  
trademark based  
on our longstand-  
ing Griffin motif.

For Bowers &  
Ruddy, the griffin  
is an ideal  
representative. Its  
stature as the most  
classic of mythical  
characters conveys

a sense of antiquity: a link with the most elegant  
elements of the past. The griffin's role as keeper of the  
world's treasures could not be more appropriate.

To celebrate the beginning of our fall auction season,  
we are holding the Springfield Collection sale at our  
new headquarters. We look forward to seeing you there  
and will be pleased to help you in anyway we can.

# Helpful Mail Bidding Instructions

**B**idding in this sale can be an interesting, enjoyable, and numismatically rewarding experience. If you're an old-time bidder with us you may find some of the following comments will increase your bidding success. If this is your first sale then we particularly recommend that you read this commentary. The paragraphs are numbered for reference in the event that you wish to ask further questions about any aspect. Have a question? You get *personal service* at Bowers and Ruddy Galleries. Please feel free to write or call and a member of our Auction Department staff will gladly answer it.

**1.** Read the Terms of Sale in the front of the catalogue. Note a 10% buyers premium will be added to all successful bids.

**2.** Mail your bid sheet as early as possible. This is particularly important if you're a new bidder, for it takes us time to check your references. Also, this assures that your bid sheet will be received before the sale. A bid sheet mailed a few days before the sale might not reach us until a week later—at which time the coins have all been sold to others!

**3.** We've found it best to use a *work sheet* to compile bids. In this way you can check back and forth throughout the catalogue, make changes and revisions, and so on. Then when you've decided on your final bids enter them on the bid sheet. Try your best to keep the bid sheet neat and clearly understandable, listing the lots in order.

**4.** If you are a new bidder, send along references and a 25% deposit.

**5.** Be prepared to pay in full for all lots for which your bids are successful. Don't bid more than you want to pay! Review your financial circumstances carefully before bidding. If you are awarded lots you are legally bound to pay for them.

**6.** Please keep current price levels in mind when bidding. While high and low prices sometimes occur, most items sell within market ranges. If a popular coin sells for \$500 on the retail market, chances are not good that a bid of, say, less than \$400 will win it. On the other hand, chances are excellent that a bid in the \$500 to \$600 range will be a winner. There is no harm in bargain hunting, but as your time is valuable (and so is ours) it is most productive if you keep current values in mind while bidding!

**7.** Auction invoices are due upon receipt unless *prior* credit arrangements have been made with us.

**8.** You may pay for your auction lots with Visa, Master Charge, or American Express charge card.

**9.** Be sure to sign your bid sheet.

**10.** Ink is best for writing bids. Pencil tends to blur.

**11.** If bid changes are necessary, do not write over any figures. Instead, cross them out completely and re-enter the bids.

**12.** Put your telephone number on the bid sheet. In this way we can call you if there is any question about a bid.

**13.** Submit bids in even dollar amounts. Cents and fractional dollar amounts will be ignored.

**14.** Check your bid sheet carefully. You will be responsible for any bids on wrong lots or for the wrong amounts. Please, please be careful!

**15.** Don't forget to take advantage, if you wish, of the optional 10% or 20% increase to really help your chances of being a successful bidder.

**16.** If you wish to limit your total expenditure, please write MAXIMUM EXPENDITURE \$\_\_\_\_\_ and the amount at the top of your bid sheet. You can then submit bids for amounts up to *four times* the amount of the maximum expenditure. This is a *personal service* and a Bowers and Ruddy customer representative will personally attend to your bid sheet by bidding from the auction floor, buying lots for your account until your authorized expenditure is reached. Due to the bookkeeping involved, this service is offered only to bidders with maximum expenditures of \$1000 or more. MAXIMUM EXPENDITURE and "ONE LOT ONLY" bidding cannot be combined.

**17.** Up to five lots may be grouped with brackets for a "ONE LOT ONLY" purchase, if you wish to purchase only one example of a coin of which several examples appear in the sale. Such lots should be bracketed with the notation "ONE LOT ONLY" appearing.

**18.** Lots may be inspected by mail prior to the auction. Please write or call for further information.

**19.** Our Auction Department is here to serve your needs. We really appreciate your interest and business and will do anything we can to make auction bidding by mail more enjoyable for you. We look forward to receiving your bids.

**20.** If you want to *sell* your coins by auction, call or write for our free, informative brochure, *How to Sell Your Coins for the Best Price*.

## Instructions to Bidders

### Please Read Before Bidding

#### TERMS OF SALE

1. All bids are to be per lot; no lots will be broken. In the event of identical bids on the same lot, the lot will be awarded to the first bid received. In the event of a dispute during floor bidding the auctioneer may at his discretion immediately put the lot up for sale again.

2. A buyers charge of 10% on each individual lot will be added to all purchases made by all bidders and will be based upon the total amount of the final bid. This buyers charge will be added to all invoices.

3. All sales are strictly for cash payable in U.S. dollars drawn on a U.S. bank. Invoices must be paid within 5 days of receipt. Shipping, handling, postage and registration charges will be added for lots delivered by mail. All bidders not furnishing resale permits will be responsible for sales tax as required under the law for lots delivered in the state of California. Any account not paid within the prescribed terms as outlined above will be billed additional interest and collection charges at the rate of 1 1/2 % per month.

4. Bidders not known to us must furnish satisfactory references and/or a deposit equal to 25% of the bids submitted (which will be applied to purchases; any difference will be billed; any overage will be refunded). We reserve the right to obtain payment in full before delivery of the lots from any successful bidder even if satisfactory references are submitted. Title does not pass until lots are paid for in full.

5. All lots must be paid in full prior to shipment, unless previous credit arrangements have been specifically agreed to by Bowers & Ruddy. Please contact our credit department in advance if you have any questions regarding your purchase.

6. No "buy" or unlimited bids will be accepted. No bids will be accepted from minors. The auctioneer and/or the cataloguer reserves the right to refuse any bid which, in our opinion, is not made in good faith or does not qualify by reason of credit.

7. All items are guaranteed genuine.

8. **We cannot be responsible for your errors in bidding**, so check your bid sheet carefully. Please bid in even dollar amounts. All bids not in even dollar figures, including those increased by 10% to 20% (see our special service on the bid sheet), will be rounded off to the lower whole dollar amount. All bid sheets must be signed.

9. **Auction sales are not approval sales.** Any lot may be examined before bidding. **No lot may be returned by a mail bidder without our permission in writing. Requests to return coins must be made in writing within three days of receipt of the coins.** Late remittance for purchases, however, is cause to negate this privilege.

10. **No lots may be returned for any reason by floor buyers** (including those acting as agents for others). **All floor sales are final.**

11. **Any claims involving errors in the catalogue or for other reasons must be made within three days of receipt of the coins.** Bowers and Ruddy Galleries acts as agents for the various consignors. For this reason, **no claims of any kind can be considered after the settlements have been made with the consignors.** Any dispute after the settlement date is strictly between the bidder and the consignor, without involvement or responsibility of Bowers and Ruddy Galleries and/or the cataloguers. Bowers and Ruddy Galleries reserves the right to include its own material in any auction. In the event of a typographical error or attribution error or other error, **the cataloguer reserves the right to withdraw any item from the sale without notice**, or, if the error is discovered at a later date, to refund the buyer's money without further obligation. By placing a bid in this sale you agree that this transaction and these terms shall be construed in accordance with the laws of the state of California. Any controversy or claim arising out of or relating to this sale shall be settled by binding arbitration in Los Angeles, California, in accordance with the rules of the American Arbitration Association, and judgment upon the award rendered by the arbitrator(s) may be entered in any court having jurisdiction thereof.

# Introduction

WELCOME TO THE SPRINGFIELD COLLECTION SALE. IN today's world of active numismatic trading, with the formation, and dispersal of collections occurring within a relatively short amount of time, and with coins changing hands frequently, it is not often that a true old-time collection comes on the market. However, sometimes such events do occur — and the present catalogue highlights one of them!

The major consignment to this auction is that of the Springfield Library and Museum Association, known as "the Quadrangle". Located in the heart of downtown Springfield, Massachusetts, the Quadrangle is unique as a cultural center in the United States. It combines in one association and in one stimulating atmosphere four diverse museums and a city library, each administered by its own director and staff. Serving as its focal point is a picturesque common outlined by a pedestrian walk and a drive which afford easy access to all the units. It also creates a quiet setting for the Quadrangle in sharp contrast to the cement and asphalt of the rising buildings and bustling business community around it.

Organized in 1857, the Springfield Library and Museums Association was incorporated in 1864 as a non-profit organization dependent on private and municipal funding. It is made up of the Springfield City Library System, the Science Museum, the George Walter Vincent Smith Art Museum, the Connecticut Valley Historical Museum and the Museum of Fine Arts, all governed by one Board of Trustees.

The Quadrangle is often identified by the famous statue of "The Puritan" by Augustus Saint-Gaudens, well known in numismatic circles. The statue stands in a small park adjoining the City Library building.

In 1907 Henry Lee, one of the most prominent numismatists of his day, donated an outstanding collection to the Springfield Library and Museums Association. For many years Mr. Lee had patiently collected Proof sets from 1859 onward, and acquired beautiful pieces in many other series, and otherwise formed an outstanding display. In the pages to follow you will have the opportunity to bid on individual Proof coins from 1859 through 1907, with the exception of about a dozen pieces which were removed from the collection years ago. An illustrious set of 1883 Hawaiian coins must have been one of Mr. Lee's prized possessions, as many other items listed in the pages to follow must have been.

In the years after 1907 the Springfield Coin Club made many additions to the group, thus rounding out the display. Other occasional donations were received from time to time.

Now, in 1981, the Springfield Library and Museums Association, like numerous other institutions in America, feels that the assets represented by the rare coin collection, a collection which requires special cataloguing expertise, extensive security precautions, and custom display facilities, can be better utilized in other areas of activity. So, the decision was made to offer the pieces through unrestricted public auction sale by Bowers & Ruddy Galleries. A beautiful collection of foreign and ancient coins was also consigned; these pieces will be auctioned by us in December.

Another treasure from the past, offered for your bidding consideration in the present catalogue, is the Mark W. Collet Collection (beginning with Lot 2557). As stated later in the catalogue, Dr. Mark W. Collet was a young physician who lived in downtown Philadelphia in the late 1850s. He was one of the nine original founders of the Numismatic Antiquarian Society of Philadelphia, a group organized in 1857, and was elected the first treasurer for a term which eventually extended from January 1858 to December 1861. Entering the Union army, Dr. Collet served on the front line and was killed in the Battle of Chancellorsville in May, 1863.

In 1859 Dr. Collet published a catalogue of American store cards, one of the earliest references in the field. His personal collection of tokens remained in the Collet family until the early 1920s. After that time it changed hands, passing into the possession of the present consignor. This amazing collection, mainly consisting of pieces manufactured by Scovill, will rank as one of the most outstanding auction offerings of the decade — not in terms of value but in terms of numismatic significance to specialists in the series.

Added to these consignments are coins from several other sources, making it an auction which literally contains something for everyone. Colonials, half cents, large cents, Indian cents, 19th and 20th-century Proofs, Type coins, Liberty Walking half dollars, Morgan and Peace dollars, U.S. gold coins, tokens, paper money, and other series are listed, illustrated, and described.

The present catalogue is largely the work of Joe Parsons of our staff, who spent many hours checking the individual pieces, attributing them, and describing them for auction listing. Dr. George J. Fuld researched and described the tokens, and I had the pleasure of adding a few comments here and there.

We have endeavored to be complete in our descriptions, but if there is any other information you require, do not hesitate to call Cole Danehower, Manager of our Auction Department. There are certain to be some excellent "buys". So, if you see an item which looks interesting, by all means bid on it! One thing is sure, however: if you don't bid on it there is no way that you will be able to own it. After each sale we have people who read the prices realized and say "I wish I had known that such and such coin went for only such and such amount." Of course, by that time it is too late to do anything. Right now, as you hold the catalogue in your hand and before the auction takes place, you can do something about it! "He who hesitates is lost," it has been said. In the field of rare coin auctions, he who hesitates to bid certainly loses out on many attractive buys that are to be made.

I suggest that if you see an item which you need to fill in a type set or a particular piece, the last opening in a date and mintmark collection, or if you otherwise intensely want to own it, bid liberally. On others which you might like to own only if "the price is right," bid conservatively. Take advantage of the present opportunity and look through the catalogue carefully.

Items of high quality have traditionally brought the highest prices. In up markets and down markets, quality has always been in demand. Right now, in 1981, many pieces particularly those in the Uncirculated and Proof categories, can be purchased for less than they would have cost if acquired a year and a half ago. But, human psychology is perverse, and there are many bidders who would have excitedly pushed the price of a given coin up to \$10,000 in April 1980 who hesitate to bid \$8,000 on the same coin today! However, history shows that those who have not followed the masses but who have thought independently have done the best. For example, those who purchase coins at the lull in the market of 1975 and 1976 saw their purchases double, triple, quadruple, or even further increase in value when the market zoomed during the 1978-1980 years. "Smart money" was in there bidding in 1975 and 1976, but those who were following popular psychology, stayed away. Don't let this happen to you now. While the future is unknown, and we have no way of knowing whether the next coin boom will come in 1982 or 1983, certainly today's market offers many marvelous opportunities to acquire superb pieces at prices reduced from what they were in 1980. Why not think for yourself and take advantage!

If you have been a regular participant in our auction sales, thank you for your business and support. The auction activity of our firm, the level of price records sustained, and the sheer volume of business we have experienced in recent years has been unmatched by any other rare coin company. The Garrett Collection, sold from 1979 through early 1981, set many world record price figures. However, a very meaningful price record — the highest price ever recorded for any coin struck at the U.S. Mint — was set by us not in the Garrett sale but, rather, scarcely a month or so ago at the ANA auction in New Orleans when we sold a 1907 pattern \$20 piece for \$475,000. Whether you buy a coin in one of the sales for \$47.50, \$475, or any other figure — including \$475,000, your business is truly appreciated. While the expensive coins make the most exciting headlines, the backbone of our auction business is composed of thousands of individual bidders who buy large cents in Very Fine grade, who bid on common date Morgan dollars, who are working on type sets of the 20th century, and who are otherwise carefully building individual collections of interest. They may not aspire to own landmark rarities but, rather, to own a representative collection of pieces which are beautiful to view and which it is hoped will be a financial treasure for the future as well. And, time has proved such bidders right. Take any of our auction sales from the early 1970s, check the spectacular record prices which made headlines then, and almost without exception you would give an eyetooth to be able to buy them today! There is no substitute for a combination of quality, rarity, and beauty — and with this in mind we urge you to bid liberally today. The coins are beautiful, and the market conditions are right to give you some potentially superb buys. A really great sale awaits you. I sincerely hope you obtain the special pieces which interest you most.

Sincerely,

A handwritten signature in black ink, appearing to read "Dave", written in a cursive, flowing style.

# SESSION ONE

(U.S. Coins)

**Tuesday Evening, September 22. 7:00 P.M. Sharp.**  
**Lots 1-640**

## U.S. Colonial Coins

- 1 (1694) Elephant Token. London reverse. Thick planchet. Fine overall. Some weakness at the center of the reverse as usually seen. One of the more popular Anglo-American issues.
- 2 Trio of Connecticut coppers. 1787 Mailed bust left. The horned bust. VG.

- 3 1785 Connecticut. Mailed bust right. Miller 6.3-G.1. Fine or better. Weak borders as struck. A coin which has received very little *actual wear*. An item for the specialist.
- 4 Pair Talbot, Allum & Lee mulings. Each features the die combination of the Talbot, Allum & Lee obverse, LIBERTY & COMMERCE, 1794, with another die featuring John Howard, philanthropist. Each is on a thin planchet with lettered edge. One is Fine and the other is glossy Very Fine. A nice pair! (Total: 2 pieces)

- 5 1787 Triple-struck Fugio copper. This piece was struck once, then struck again, then struck a third time. It is the most spectacular, most marvelous example of a multiple-struck Fugio copper we have ever seen, as the enlarged illustration above dramatically indicates! Very Fine or better condition, with all features sharp. A prize item for the Fugio specialist.

*From our sale of the Scott Collection, June 1975, Lot 94.*

- 6 1773 Colonial medal of William Pitt. Betts-522. Obverse with portrait of William Pitt (who was Earl of Chatham). Reverse with inscription in three lines: LORD CHATHAM 1773. Struck in copper as always. Nice Very Fine.

*From our Scott Collection sale, June 1975, Lot 627.*

## U.S. Half Cents

- 7 1797 1 over 1 variety. Cohen-1, Gilbert-4. Intermediate state of the dies with breaks but without complete failure. Pleasing Choice Very Fine-30. Glossy brown surfaces.
- 8 Trio of half cents: 1800 Very Fine-20; 1804 Crosslet 4, Stems. Very Fine-20, cleaned long ago; 1851 glossy brown AU-50. (Total: 3 pieces)
- 9 Quintette of half cents: 1828 13 stars, EF-40; 1832 Choice EF-45; 1833 EF-40; 1834 EF-40; 1855 AU-50, but whizzed. (Total: 5 pieces)
- 10 Group of three half cents: 1828 13 stars, EF-40; 1851 EF-40; and another 1851, EF-40 but with many surface marks. The first and third pieces were cleaned long ago and have since retoned. (Total: 3 pieces)

- 11 1835 Uncirculated, MS-60, with some claims to Select Uncirculated, MS-63. The obverse is a combination of dusky brown with mint orange. The reverse is nearly fully original mint red with just a hint of light brown toning. Importantly, this is a coin which has never been cleaned, dipped, or "fussed with." Such pieces, particularly in the early copper series are increasingly rare as more and more collectors clean their pieces in a misguided attempt to make them more valuable (the opposite effect is obtained). Roger Cohen notes that a hoard of approximately 1,000 pieces of this date was dispersed in the early 20th century. The coins from this hoard have been widely scattered, and we doubt if even a third of them survive today without having been cleaned. The present piece is an ideal candidate for a type set.
- 12 1849 MS-63, Select Uncirculated. More than 50% mint red. Very rare date with original color.

- 13 1854 Extremely Fine-40. A few edge marks.

## U.S. Cents

- 14 1821 EF-40. Medium brown surfaces. Very sharp and attractive. A nice example of one of the scarcer dates after 1814.
- 15 Pair of large cents: 1838 Choice AU-55. Extremely sharply struck. Glossy brown surfaces; 1852 brown Uncirculated, MS-60. Lightly struck, particularly around the borders. The centers are sharp. (Total: 2 pieces)
- 16 1851 Uncirculated, MS-60. Glossy brown with some minor traces of original mint red. Attractive overall. A nice candidate for a type set for the numismatist who does not want to pay much, much more for a Brilliant Uncirculated example.
- 17 1856 Slanting five in date. Select Uncirculated, MS-63. Predominantly glossy brown, but with ample traces of mint red — perhaps about 20 percent of the coin's surface. Sharply struck.
- 18 1858 Flying eagle. Small letters. AU-50.
- 19 1858 Large letters. Extremely Fine-40. Lightly polished long ago.

- 20 **1860 Choice Brilliant Uncirculated, MS-65.** First year of the Indian head style with oak wreath and shield reverse, and especially important as such to type set collectors. A nice strike.
- 21 Group of four Indian cents: 1860 Choice VF-30; 1874 AU-50; 1900 Select Brilliant Uncirculated, MS-63. Mostly mint red with some brown flecks. Quite attractive overall! **1909-S Indian.** Very Good. A few light obverse scratches. (Total: 4 pieces)
- 22 1861 Select Brilliant Uncirculated, MS-63. Very sharply struck. Light natural toning. A superior example of this, the most elusive of the copper-nickel Indian cent dates.
- 23 1861 Select Brilliant Uncirculated, MS-63, with some claims to an even higher grade. Light iridescent toning. Extremely well struck. Another magnificent coin.
- 24 1863 Choice Brilliant Uncirculated, MS-65. A few minor flecks. Another sharply struck example.
- 25 1864 Copper-nickel. Select Brilliant Uncirculated, MS-63, if not a bit finer. With large die break at lower left on reverse, an unusual feature for an Indian cent. Like the preceding, well struck.
- 26 Pair of Indian cents: 1864 copper-nickel. Select Brilliant Uncirculated, MS-63. Unusual die break in upper right of obverse; 1864 bronze. Select Brilliant Uncirculated, MS-63, with many features of MS-65. Both pieces are pristine and are very excellent examples of their issues. (Total: 2 pieces)
- 27 1864 Bronze. Choice Brilliant Uncirculated, MS-65. Light magenta toning. A beautiful example of the first bronze cent issue.
- 28 **1864-L** on ribbon. AU-50. Medium to light brown surfaces. Some minor verdigris, undoubtedly removable, in the date area. A sharp specimen of this classic Indian cent rarity.
- 29 1865 Select Brilliant Uncirculated, MS-63. A pleasing coin.

- 30 1866 Choice Brilliant Uncirculated, MS-65. A splendid coin, reminiscent of the Oscar G. Schilke Collection of Indian cents, each one matched, which we purchased about twenty years ago.
- 31 1866 Choice Brilliant Uncirculated, MS-65. Some brown and green flecks on the reverse.
- 32 1868 Select Brilliant Uncirculated, MS-63.
- 33 1869 Choice AU-55. Glossy brown surfaces.
- 34 1870 Choice Brilliant Uncirculated, MS-65. Not easy to find in this condition.
- 35 1873 Select Brilliant Uncirculated, MS-63. Full blazing original mint color. Just a whisper (really) of an ancient fingerprint at the center of the reverse keeps this out of the MS-65 category. A blazing coin which should attract a strong bid, and deservedly so.
- 36 1874 Select Brilliant Uncirculated, MS-63.
- 37 Pair of Indian cents: 1874 and 1876. Each is Select Brilliant Uncirculated, MS-63, and each has its natural color just beginning to tone with traces of brown. (Total: 2 pieces)
- 38 Pair of Indian cents: 1876 and 1883, each Select Brilliant Uncirculated, MS-63, with traces of light brown toning just beginning to form. Virtually identical to the preceding, and probably kept in the same collection over a long period of years. (Total: 2 pieces)

- 39 **1878 Choice Brilliant Proof-65.** Some very light brown toning. An especially nice piece which has never been cleaned or dipped. Quality such as this is becoming quite elusive. The present sale offers many such pristine pieces. Discriminating bidders may wish to take advantage of the opportunities presented.
- 40 Group of five Proof Indian cents: 1878, 1880, 1884, 1885, 1888, with the 1885 being considered a scarcer date. The average grade is Select Proof-63 with light brown toning. A nice "old time" group. (Total: 5 pieces)
- 41 1879 Choice Brilliant Uncirculated, MS-65. A beautiful coin which requires no apologies of any kind. Quality such as this is rare, rare, rare in today's market!
- 42 Trio of Proof Indian cents: 1881 Select Proof-63, 1883 Select Proof-63, 1889 Proof-60. Each is an uncleaned specimen with varying degrees of light brown to medium brown toning. (Total: 3 pieces)
- 43 Group of Proof Indian cents: 1883 Proof-60, 1893 Proof-60, 1898 Select Proof-63, 1899 Select Proof-63, and 1900 Select Brilliant Proof-63. From the same old-time collection as are most of the other items offered here. With varying degrees of brown and iridescent toning. An attractive group. (Total: 5 pieces)
- 44 1883 Choice Brilliant Uncirculated, MS-65. A splendid specimen.
- 45 A large and varied group of Uncirculated Indian cents: 1885 MS-60, 1890 MS-63, 1895 MS-63, 1898 MS-63, 1902 MS-60 cleaned, 1903 MS-60, 1904 MS-63, 1905 MS-60, 1906 MS-60, 1907 MS-60. With the exception of the 1902, all are beautiful examples with natural toning. A pleasing group. (Total: 10 pieces)

- 46 1889 Choice Brilliant Uncirculated, MS-65.
- 47 Pair of Proof Indian cents: 1891 Proof-60 and 1906 Select Proof-63. Each is deeply toned. (Total: 2 pieces)
- 48 1893 Choice Brilliant Uncirculated, MS-65. Some wisps of natural light toning. A splendid piece.
- 49 Group of Uncirculated Indian cents: 1898 Select Uncirculated, MS-63; 1899 appears to be Choice Brilliant Uncirculated, MS-65, but we believe it to be whizzed; 1904 Uncirculated, MS-60; 1905 Choice Brilliant Uncirculated, MS-65. (Total: 4 pieces)
- 50 1902 Choice Brilliant Proof-65.
- 51 1902 Choice Brilliant Proof-65. Another splendid specimen.
- 52 1905 Choice Brilliant Uncirculated, MS-65.
- 53 1905 and 1908, each Choice Brilliant Uncirculated, MS-65. A delightful pair. (Total: 2 pieces)
- 54 1906 Choice Brilliant Uncirculated, MS-65.
- 55 Pair of Indian cents: 1908 and 1908-S, each Uncirculated, MS-60. The first has considerable mint color but is mostly brown. The second is almost completely brown-toned. The second is, of course, scarce and represents the first branch mint coin of this denomination. (Total: 2 pieces)
- 56 Pair of Indian cents: 1909 Brilliant Uncirculated, MS-60; 1909-S glossy brown AU-50. The flatter variety is scarce. (Total: 2 pieces)

- 57 **1909-S V.D.B. Select Brilliant Uncirculated, MS-63.** Original mint color fading to light brown. A pristine piece which has never been cleaned or dipped.

Although other Lincoln cents in this grade may command higher prices, the 1914-D, 1922 "plain," and 1955 Double Die being examples, none has the fame of the present issue. For many years this has been the rarity in the Lincoln cent, a piece viewed with worshipful awe by schoolboys and others who attempted to find examples of this coveted coin in circulation. Now, of course, some consider *any* Lincoln cent prior to 1959 with a "wheat" reversed to be "scarce," relatively speaking. Gone are the days when one could even hope to find a worn example of this coin in circulation.

- 58 1909-S Lincoln. Choice Brilliant Uncirculated, MS-65. A bright and pleasing example of this scarce issue.
- 59 1909-S Lincoln. Select Brilliant Uncirculated, MS-63. Mostly original mint color but with areas of light brown.
- 60 1910-S Choice Brilliant Uncirculated, MS-65. A magnifying glass reveals a few tiny flecks here and there, but these do not seem to be all that important in view of the overall quality of the piece. Full bright color.
- 61 1922 "Plain." Fine-12, but with some light scratches and a nasty dig on the obverse. Brown toning. A genuine example of this prized variety, a variety caused by inadequate die pressure and/or a worn obverse die.
- 62 1931-D Choice Brilliant Uncirculated, MS-65. While most of the glamour and glory have gone to the 1931-S of the same year, a coin with lower mintage, in *Uncirculated* grade the 1931-D is decidedly rarer. The present example is a nice one.

- 63 1931-S Uncirculated, MS-60. Mostly light brown but with ample tinges of mint color. A small carbon spot near the right obverse rim. A glass shows some light marks, particularly on the obverse, providing the reason for this coin not being assigned a higher grade. Still a sharp and nice example of this fantastically popular low mintage coin.
- 64 1937 Choice Brilliant Uncirculated, MS-65.
- 65 **1955 Double Die. Uncirculated, MS-60.** Lustrous brown surfaces with a few tinges of mint red. A few years ago the cataloguer (Q. David Bowers) wrote a feature article on this coin, "the Double Die and I," which appeared in *Coin Magazine* (issued by Krause Publications, Iola, Wisconsin). James F. Ruddy and I had a deep and dramatic involvement with this variety when it first became popular. Briefly, they were scarce from the outset, but the demand for them was not strong. But then the variety "caught on," and we kept busy trying to fill the many orders received. At one time our source of supply was local, for pieces were initially released in our area. Today, over two decades later, the small supply of 1955 double die cents has become widely scattered. Only occasionally do we ever see even a small group of two or three pieces.
- 66 1972 Double Die. Choice Brilliant Uncirculated, MS-65. While the doubling is not as dramatic on this as on the 1955, it still is quite visible, particularly under low magnification. The example offered here is fully brilliant with a few wisps of brown.

## U.S. Nickel 5-Cent Pieces

- 67 1868 Shield. Choice Brilliant Uncirculated, MS-65. A particularly sharp strike.
- 68 Group of nickels comprising several different design types: 1872 Shield Proof-60. Some light toning; 1883 Liberty without CENTS. Brilliant Uncirculated, MS-60; 1911 Liberty (a variety with CENTS). Choice AU-55; 1916 Buffalo. Select Brilliant Uncirculated, MS-63; 1934-D Buffalo, same type as preceding, MS-60. Lightly struck. (Total: 5 pieces)
- 69 Pair of Proof nickels: 1883 Shield and 1883 Liberty with CENTS. Each is Proof-60, rather dull, and with some flecks. Perhaps each is a candidate for *judicious* cleaning. (Total: 2 pieces)
- 70 1883 Shield Select Brilliant Proof-63. Some light toning. Last year of this shield design.
- 71 Group of nickels, mostly different types: 1883 Shield, Brilliant Uncirculated, MS-60; 1883 Liberty without CENTS Select Brilliant Uncirculated, MS-63; 1911 Liberty AU-50; 1913 Type I Buffalo, AU-50; 1916-S EF-40 but with scratch on obverse; 1921 EF-40. (Total: 6 pieces)
- 72 1883 Liberty nickel without CENTS. Choice AU-55.
- Note: In each auction we attempt to provide a number of lots of relatively inexpensive value so that each sale has literally "something for everyone." The present lot is a nice example of a coin which is not particularly scarce and which is not in the best condition, but still will fill a need for someone somewhere.*
- 73 1905 Brilliant Proof-60.
- 74 1913 Buffalo. Type I. Choice Brilliant Uncirculated, MS-65.
- 75 Trio of early Buffalo nickels, each of the Type I design. 1913 MS-60, 1913-D MS-65, 1913-S Choice EF-45. Each has attractive iridescent toning. A group of coins which has probably been kept together for many years, for they are toned alike. Attractive! (Total: 3 pieces)

- 76 1913-D Type I Buffalo. Select Uncirculated, MS-63. Medium gray toning.
- 77 Group of varied Buffalo nickels: 1914 AU-50; 1914-S Choice EF-45; 1915 AU-50; 1915-D Uncirculated, MS-60; 1916-S AU-50, cleaned long ago. With the exception of the last piece, all have beautiful iridescent toning. A nifty group. (Total: 5 pieces)
- 78 1914-D Uncirculated, MS-60. Light toning.
- 79 Pair of Buffalo nickels: 1916 Choice Uncirculated, MS-65; 1916-D Select Uncirculated, MS-63. Each with attractive light iridescent toning. (Total: 2 pieces)
- 80 **1918/7-D** Overdate. Good-4. All features well defined. The rarest major variety of the series.
- 81 **1918/7-D**. Good-4. A nice mate to the preceding, although not quite as sharp.  
 Note: The 1918/7-D overdate was not discovered until several years after the issue had been released into circulation, thus furnishing the explanation why Uncirculated pieces are great rarities today. Even after it was discovered, little attention was paid to the variety until the 1940s and 1950s. By that time most pieces had become well worn.
- 82 Pair of nickels: 1918 MS-60, BU and 1919 MS-65, BU. Two beauties. (Total: 2 pieces)
- 83 1919 Brilliant Uncirculated, MS-60.
- 84 1919-S AU-50. Really beautiful iridescent toning. A sharply struck piece.
- 85 1920 Choice Brilliant Uncirculated, MS-65.
- 86 Pair of Buffalo nickels: 1921 MS-60, BU and 1923 MS-63, BU the former with attractive iridescent toning. (Total: 2 pieces)
- 87 Group of Buffalo nickels: 1924 AU-50; 1925 Brilliant Uncirculated, MS-60, beautiful iridescent toning; 1926 Choice Brilliant Uncirculated, MS-65; 1926-D Choice Extremely Fine-45. The rarest coin in the lot? The 1926-D, for it happens to be a *very sharp strike* — and, as such, it is a *major rarity*. 99 and 44/100ths percent of the examples encountered of this date are very weakly struck. (Total: 4 pieces)
- 88 Group of nickels: 1927 MS-60, BU; 1928 MS-63, BU; 1928-D MS-60, BU; 1928-S Choice AU-55. Most have light iridescent toning. (Total: 4 pieces)
- 89 Group of Buffalo nickels: 1929 MS-65; 1929-D MS-65; 1929-S MS-60; 1930 MS-60; 1930-S MS-60; 1934 MS-65; 1934-D MS-65 (weakly struck). Most with light iridescent toning. A nice group. (Total: 7 pieces)
- 90 1931-S Select Uncirculated, MS-63. Light and golden toning. One of the most popular of all Buffalo nickels due to the low mintage.
- 91 Group of Buffalo nickels: 1935 MS-63, BU; 1935-D MS-63, BU; 1935-S AU-50; 1936 MS-63, BU; 1936-D MS-63, BU; (reverse planchet defect), 1936-S MS-63, BU; 1937 MS-63, BU; 1937-D MS-63, BU; 1937-S MS-60, BU; and 1938-D MS-65, BU. (Total: 10 pieces)
- 92 1937-D Buffalo. Three legged variety. A nice EF-40 example of this popular rarity.
- 93 1942 Type I. Choice Brilliant Proof-65. Some light natural toning.

## U.S. Half Dimes

### Scarce 1794 Half Dime

- 94 **1794 Valentine-4**. First year of issue of this denomination, and one of three silver denominations released this year (the other two: the half dollar and dollar). Choice Very Fine-30. Pleasing medium gray toning. Some claims to Extremely Fine. An attractive specimen of this important half dime.

### 1795 Half Dime

- 95 **1795 V-4**. Second year of the half dime. With Flowing Hair obverse and small eagle reverse as preceding. An important "type" issue. Extremely Fine-40. Some minor surface marks are visible under magnification, but the overall aspect is quite attractive. Light to medium gray toning in areas.

### Elusive 1797 Half Dime

- 96 **1797 15 Stars, V-2** Draped bust obverse, small eagle reverse. Choice Very Fine-30 with some claims to Extremely Fine-40. Attractive light toning. A sharp specimen of this extremely desirable type coin.

When James F. Ruddy was doing the research for his *Photograde* book in the late 1960s he told this writer that the half dime of this type, the design of 1796-1797, was the most elusive to obtain in the various grades needed for illustration.

### Scarce 1805 Half Dime

- 97 **1805** Last year of the draped bust obverse with heraldic eagle reverse. Very Fine-20. Some areas of light striking on the reverse. Light gray toning. A scarce issue, second only to 1802 in rarity among half dime dates of this design.
- 98 Group of bust type half dimes: 1829 Choice EF-45, 1831 EF-40, 1837 Choice VF-30. With varying degrees of light toning. (Total: 3 pieces)
- 99 1834 EF-40.
- 100 Pair of half dimes: 1858 and 1860. Each is EF-40. The latter is lightly toned. (Total: 2 pieces)
- 101 1857 Uncirculated, MS-60. Light mottled iridescent toning. Light vertical scratch on center of obverse.
- 102 Pair of half dimes: 1869 Brilliant Uncirculated, MS-60; 1872-S, mint-mark within wreath, Uncirculated, MS-60. The 1872-S has an olive surface with some minor toning areas and is perhaps a candidate for careful dipping. Both pieces are exceptionally well struck examples of their issues. (Total: 2 pieces)

### U.S. Dimes

- 103 **1807** Last year of the draped bust type with heraldic eagle reverse. Very Fine-20. Some areas of light striking around the borders as nearly always seen on specimens of this date. Light gray toning.

- 111 1892 Choice AU-55, with full lustre.

- 112 **1893/2 Overdate, MS-63, Select Uncirculated**, mostly brilliant, light toning at the rims. Traces of an underlying 2: dot at lower knob of 3, traces of curve inside upper loop of 3 and that is all. Still very rare; not many have turned up since the Uncirculated Henri Heller coin was published in a front page *Coin World* story in the mid 1960s.
- 113 1902-O MS-60, Brilliant Uncirculated.
- 114 1907, 1910, 1949-S, 1950-S. Brilliant Uncirculated. The two Barbers are MS-60 and Select MS-63; the Roosevelts are Choice MS-65. (Total: 4 pieces)

## Half Dollars

- 190 1795 O-117. Strictly Fine-12, natural light iridescent toning, few scattered light adjustment marks but generally choice surfaces for the grade. Scarce variety.

*Note: Y in LIBERTY punched over another letter, bold traces of which remain. Reverse die originally used on 1794 O-102; this reverse used with five different 1795 obverses. Note the Type 1 reverse hub with single feather of left wing of eagle extending beyond wreath. Other 1795 reverses (except O-119) have a different reverse hub with two feathers beyond the wreath. Evidently one of the first 1795 varieties, as one of these was struck in copper as a die trial, then cut down and later used as a planchet for a 1795 half cent, Gilbert-5; see the Dr. Charles Ruby sale, part 1, Lot 196.*

- 191 1802 Choice VF-30, some lustre, cleaned. Seldom offered much sharper than this.

- 192 1803 O-101. Large 3 in date; 12 arrows, small stars above eagle, as in

1806. EF-40, steel gray with light gold iridescence at the rims. A pleasing example of this type, and a scarcer date as well.

- 193 1805 O-108 (R-6). EF-40 or so, light streaking on obverse from inhomogeneities in the strip from which this planchet was cut. Gray toning.
- 194 1811 Large 8, as in 1812-1815. O-104. Choice EF-45, surfaces full of mint lustre, beginnings of a pale gold tone. Usual obverse diecracks. Scarcer than the small 8 type; undervalued.
- 195 1813 O-110. AU-50, sharper on reverse than obverse, beautiful steel-blue toning with much underlying lustre. Variety with the bold obverse clash marks, including the reverse motto below the bust.
- 196 1819 AU-50, lightly cleaned.
- 197 1819 Choice EF-45, toned.

- 198 1830 Small O. O-112 (Liberty recut, top of 3 in date filled; crossbars extend into right wing). **Extremely rare variety; listed as R-7 in Overton.** AU-50, mostly brilliant, much lustre. Only three auction records since 1971, all in VF; none in our Getty sale. Could be bid up into four figures by the half dollar enthusiasts!

- 199 1834 Large date; small letters. AU-50.

- 200 1842 Large date. AU-50, deeply toned; also 1912-D Choice AU-55, possibly Unc., but harshly cleaned. (Total: 2 pieces)

- 201 Interesting lot of half dollars: (1) 1842 Large date, double-punched; reverse shattered around legend. EF-40, toned, much lustre; (2) 1843-O EF-40 with steel gray color; (3) 1845-O Triple date, three cuttings, one above the other. VF-20, cleaned; (4) 1846-O Small date, no drapery. VF-20, toned; (5) 1866 Motto. EF-40, dipped; (6) 1873 Arrows. EF-40, cleaned. (Total: 6 pieces)

- 202 1845-O EF-40, sharp, but harshly cleaned.

- 203 1849 EF-40, light gray toning. Uncommon date.

- 204 1853-O Arrows and rays. AU-50, harshly cleaned and retoned.

- 205 1877-S Choice AU-55, prooflike surfaces as often on this date after the dies were polished; lightly cleaned.

206 **1894-O Barber. MS-60, frosty Uncirculated**, mostly choice and fully so on the reverse. Scarce undervalued date.

207 1899 Choice AU-55; also 1908-O Choice EF-45. (Total: 2 pieces)

## Silver Dollars

226 **1795 Flowing hair. B-5, the common three leaf variety. VF-20 or better in sharpness**, but cleaned and there is evidence of a repair on the rim below 95 of date and corresponding area on reverse.

227 **1795 Flowing hair. B-5. Fine-12**, greenish gray toning, signs of an old cleaning. Still an attractive example of the type.

228 **1795 Flowing hair. B-5. Fine-12, nearly VF.** Light gray toning and free of defects.

229 **1795 Flowing hair. B-5. Fine-12**, like the last, couple of minor rim dents.

230 1795 Flowing hair. B-9. VG-8, cleaned.

235 1796 B-5a, with the heavy lump at IC of AMERICA. A perfect Fine-12, blue-gray tones and no defects.

231 1795 Flowing hair. B-6. VF-20, steel gray toning, adjustment marks at obverse rim, one edge dent at 4:00. Three leaves under wings, same reverse die as on B-5, but about 10 times rarer with no Uncs known, and just about unobtainable above EF.

236 1797 B-1 16 stars (9 left, 7 right); large letters. Strict VF-20, traces of lustre, minor planchet pit at 5th star and another on top of hair ribbon. The soft obverse strike at top is typical.

232 1795 Draped bust. B-14, bust placed too far left. Choice VF-30, natural blue-gray and mostly free of defects, although there are some normal adjustment marks across reverse and one or two small abrasions on obverse. This kind are almost always sold today as full EF.

233 1796 B-4. Small date; large letters. VF-20, cleaned, now retoning. Basically defect-free, and will be attractive once it fully retones.

237 1797 B-1. Fine-12, toned, free of the usual defects.

234 1796 B-5. Large date; small letters (from a left-over 1795 reverse die). Choice VF-30, traces of lustre in protected areas on both sides, light gray toning deepening to green at rims. Couple of miniscule rim and edge dents, but essentially defect-free, and the kind likely to be resold as full EF.

238 1798 B-1a. small eagle reverse; 13 stars. Fine-12, obverse near VF; reverse weaker, as always. Steel gray toning with attractive iridescence on reverse. Adjustment marks show at center of obverse as made. Rare date with the small eagle reverse; more so than 1796 or 1797. This could realize nearly the full VF price.

239 1798 B-7 (R-7). High close date, knobbed 9; leaf points between RI, star distant from beak. Obverse is nearly VG; reverse a strict Good-4. Natural light iridescent bluish-steel and no defects. One of only 7 or 8 pieces known of the variety, all worn and apparently none exist above VF.

- 240 **1798 B-22.** Very wide date, first few stars on left far apart but get progressively closer; faint crack through E in STATES. **EF-40, bold,** dark steel toning. Would be universally graded AU if it had mint lustre; even as is **one of the finest known**; none exist in Unc.

- 244 **1800 B-14,** the dotted date. **EF-40,** natural blue-gray toning with a few scrapes and scratches on either side mostly camouflaged by the toning.

- 241 **1798 B-23.** Obverse of B-22; reverse of B-19 with rust pit above 4th reverse star. **Choice VF-30.**

- 245 **1800 B-16.** 00 in date placed far too high; T in UNITED recut. **Choice VF-30,** medium iridescent tones, some lustre, free of defects.

- 242 **1799 B-22 (R-6).** Die flaws in field before eye; reverse die broken in half horizontally just above shield. **Strictly EF-40,** reverse with plenty of lustre and more like EF-45; obverse weaker as always and with some unimportant planchet striations. **Finest known by far,** the two 1975 ANA sale coins did not even come close. A famous rarity and an opportunity for the specialist.

- 246 **1801 B-1. Choice VF-30,** surfaces full of mint lustre suggesting EF, and the lovely reverse fully qualifies at that level. Late cracked dies with the rare bulge at MER very plain. At least R-4 and rare condition for this die state.

- 243 **1800 B-8.** Dot inside lower part of R in LIBERTY; large berries. **EF-40** with much lustre, reverse a little weak in places, but we feel that our overall grade is accurate. Only two or three finer ones known to us; unlikely to be bettered without a real search.

- 247 **1803 B-6.** Large 3 in date. **Choice EF-45** and beautifully toned. A premium example of the draped bust silver dollar.

- 248 1846 AU-50, well-toned, mostly bluish-gray, but with an iridescent area at right obverse.
- 249 1860-O AU-50 but harshly cleaned.
- 250 1865 MS-60, cleaned Unc. Light toning.

- 251 **1869 Proof-60**, deep cobalt-blue toning, many small contact marks in fields from poor handling, but full mirror surfaces have survived. Extra high wire rims.
- 252 1871 EF-40, tan-gold toning.
- 253 1873 Proof-55, light toning, handling marks in fields; nearly full proof surfaces.

- 410 1915-S Panama-Pacific gold dollar. MS-60, Brilliant Uncirculated.
- 411 1926 Sesquicentennial \$2½ gold piece. Choice AU-55.

- 412 **1793 C-1. VG-8**, natural, mostly smooth olive-steel surfaces, weak in center of reverse as usual for the date. First variety coined; probably among the 7,000 pieces delivered July 20, 1793. Scarcest of the four 1793 varieties. A thoroughly pleasing example of this key type coin.
- 413 1794 C-4. Fine-12. Sharpness near VF but this is dark and granular, although there are no real defects of any kind.
- 414 1795 C-1. Lettered edge, thick flan, pole to bust. Good-4, dark charcoal, weak in center of reverse from early die failure.
- 415 1797 C-1. 1 over 1 in date. VG-8, greenish steel and nice for the grade. Weak in center of reverse.
- 416 1800, 1803, 1804, 1805, 1807. All Fine-12 except the 1803 which is VG-8. Nice run of draped bust half cents. (Total: 5 pieces)

- 417 **1806 C-4**, large recut 6. **MS-60, Uncirculated**, partly red, partly faded gray, small nick on cheek, usual weakness at top of wreath. Reverse die rotated 45 degrees to right. Typical Chapman hoard piece.  
*Note: Apparently the 6 was intended for the 25 cent piece and used here in error. It is double-punched and extends into the drapery. A couple of hundred Uncirculateds of this variety exist (most like the present coin); almost all of these originate from a hoard handled by the Chapman brothers in 1906, exactly 100 years after the pieces were struck. The present example is a typical Chapman piece and was donated to the Springfield Library about 1907.*
- 418 1808 VG-8; also a pair of 1809's in VF-20, and an 1810 in AG-3. (Total: 4 pieces)
- 419 1811 C-2. Strict Good-4, charcoal color and no defects. Scarce date.
- 420 Run of classic heads: 1825, 1826, 1828, 1829, 1832, 1834. These are more or less EF-40 with the 1825 more like VF-20. (Total: 6 pieces)
- 421 1833 AU-50, rose and greenish gray.
- 422 1835 Choice AU-55, sea-green and tan. Struck from clashed dies.

- 423 **1849 Large date. MS-60, Uncirculated**, medium brown with bluish overtones on obverse; a little dull on the reverse. Scarce in Uncirculated condition.
- 424 1850, 1851, 1856. The first two are AU-50; the last is more like EF-40. (Total: 3 pieces)

- 425 1853 MS-60, glossy light brown Uncirculated, much like the 1849.

- 426 1854 MS-60, Uncirculated, part faded red, but mostly light steel with some natural glossiness.
- 427 1855 MS-60, Uncirculated, obverse like the last, but reverse dull and corroded.
- 428 1857 MS-60, Uncirculated, dull, some faded red on the obverse.

## Large Cents

- 429 1793 Wreath. S-11c, single leaf after DOLLAR; edge of the later 1793 cap cents. VG-8, moderate porosity, dig in from rim right of date, otherwise basically defect-free.

- 430 1793 Wreath. Another S-11c. This one could be fairly called VG-8/Good-4, with a few old defects but rather pleasing for the grade.
- 431 1794 S-44. VF-20, bold, but dark, and with scattered corrosion pits on both sides, none too serious.
- 432 1795 S-76b. Plain edge. Good-4 overall, reverse weak in center.
- 433 1801 S-221, the corrected fraction. Fine-12, signs of where some ancient corrosion was smoothed down on obverse many decades ago.
- 434 1796 Draped bust. AG-3. Also 1797, 1798, 1800. These last three average Fine-12 or better. (Total: 4 pieces)
- 435 1802, 1803, 1805, 1806. All Fine-12—VF-20. Also 1807/6 in VG-8. (Total: 5 pieces)
- 436 1804 S-266. Good-4, dark steel, mostly smooth surfaces, free of all abnormal defects. A key date, and in demand even in this condition.
- 437 1807 VF-20, cleaned, hair detail partially re-engraved, evidently a 19th century attempt to pass this off as Unc. Interesting example of early coin doctoring; the more things change the more they stay the same!
- 438 Run of classic heads: 1808, 1809, 1810, 1811, 1813, 1814. Good-4—VG-8. A scarce lot, as it includes the 1809 and 1811. (Total: 6 pieces)

- 439 1812 Large date. S-289. Choice EF-45, dark chocolate with much underlying lustre; struck with worn dies. Some porosity from the original planchet. A nice classic head, and one easily saleable most places as "AU".
- 440 1816, 1817 13 stars, 1817 15 stars, 1818, 1819, 1820. All Fine-12—VF-20. (Total: 6 pieces)
- 441 1821-1834. One of each date in this range, including the scarce 1823. These will range from VG-8 up to VF-20 or better, with Fine-12 being the average grade. (Total: 14 pieces)
- 442 1835 Type of 1834. Choice EF-45.
- 443 1836, 1837, 1838. All EF-40 to Choice EF-45. (Total: 3 pieces)
- 444 1839 (2 pcs.), 1840, 1841, 1842, 1843, 1844. These average VF-20 or better. (Total: 7 pieces)
- 445 1845, 1848, 1849. EF-40 to Choice EF-45. (Total: 3 pieces)
- 446 1846 and 1847. Both AU-50. (Total: 2 pieces)

- 447 1850 MS-60, Uncirculated, nearly full red on obverse; reverse faded to a duller red-violet.
- 448 1851 MS-60, Uncirculated, sea-green with tinges of faded violet.
- 449 1852 and 1854. Both Choice AU-55 with faded lustre. (Total: 2 pieces)
- 450 1853 MS-60, Uncirculated, much original red on obverse; dull reddish tan toning on reverse.
- 451 1855 and 1856. Both AU-50 condition. (Total: 2 pieces)
- 452 1857 Large cent. Large date. Choice EF-45.

## Small Cents

### 1856 Flying Eagle Cent

- 453 1856 Flying eagle cent. Type of 1857, the variety pictured and listed in the *Guide Book*. Proof-60, natural gold-tan with hints of blue. A nice example of this famous rarity.
- 454 1857 High leaves at C and T. MS-63, Select Uncirculated, natural color.

- 455 **1858 Small letters; low leaves at C and T. MS-63, Select Uncirculated**, gold-tan from the original color, excellent lustre, and an above average strike. Very rare variety.

*Note: There exist at least 47 different die varieties of the 1858 flying eagle cent. Major varieties can be noted by the presence of small or large letters on the obverse, and by the position of the long leaves of the wreath with respect to C and T in the word CENT. David Proskye tabulated 35 varieties in the late 19th century; later W. C. Eaton extended the list to 47. See Wm. Evan's list in the July, 1939 Scrap-book, page 361.*

- 456 **1859 Select Proof-63**, brilliant mirror surfaces on the obverse with one carbon spot at throat; reverse duller and well-toned. Rare and seldom offered in proof; in tremendous demand as a one-year type.

- 457 **1860 Select Proof-63**. Very similar to the 1859: obverse brilliant with a single carbon spot below 6 in date; reverse with dullish toning. Very scarce and underrated like all genuine proof copper-nickel cents; only 400 or so actually distributed of this date.

- 458 **1861 Select Proof-63**, brilliant obverse with a couple of minute rim nicks; dull reverse like the last two.

- 459 **1862 Select Proof-63**, brilliant, lightly toned obverse with a couple of tiny spots; toned reverse. Copper-nickel cents in proof are definitely much underrated compared to the much more common bronze Indians.

- 460 **1864 Copper-nickel. Select Proof-63**, brilliant beautiful obverse with a few tiny flyspecks; duller reverse as on most of these.

- 461 **1864 Bronze; no L. MS-63, Select Uncirculated, prooflike**, olive-gold toning. Should be carefully examined, as it has many of the attributes

of a proof including partial mirror surfaces on the obverse, squared edges with proof-like surface, tiny spine down from crosslet of E in CENT, the known die on the genuine proofs. The heavy toning on this particular piece, and the partially rounded rims make its status uncertain, so we are being conservative.

- 462 **1865 Select Proof-63**, golden-bronze; dull on reverse. Another way to grade this piece is: Proof-65/Proof-60. Most of the copper proofs in this collection are similar and we will use this notation below.
- 463 **1866 Proof-65/Proof-60**. Gold brilliance on obverse; dull violet on reverse.
- 464 **1867 Proof-65/Proof-60**. Obverse is fully brilliant.
- 465 **1868 Proof-65/Proof-60**. Similar to last. Reverse is rotated 180 degrees from normal alignment, as often on these.

- 466 **1869 Proof-65/Proof-60**. Popular date.
- 467 **1870 Proof-60**, cleaned, retoning.
- 468 **1871 MS-60**, Uncirculated, partly brilliant, mottled toning.
- 469 **1872 MS-60**, Uncirculated, similar mottled tones. Seldom seen better.
- 470 **1873 Closed 3**. MS-60, Uncirculated, light toning, some faded red.
- 471 **1874 and 1875**. Both Proof-60, the first retoning naturally from an old cleaning. (Total: 2 pieces)
- 472 **1876 MS-60**, Uncirculated, with purple toning.

### 1877 Cent

(See Color Photo)

- 473 **1877 Choice Proof-65**, well-toned, mostly violet-gold. The key date of the series; recent records to \$5000 and more.

- 475 **1880 Proof-60** with dark violet toning.

- 477 **1882 Proof-65/Proof-60**, similar to last.
- 478 **1883 Proof-65/Proof-60**, light violet toning on obverse.
- 479 **1884 and 1885**. Proof-60, mottled toning on both. (Total: 2 pieces)
- 480 **1886 MS-63**, Select Uncirculated, mottled gray and lavender tones.
- 481 **1887 and 1888**. Proof-60 with deep irregular toning. (Total: 2 pieces)

- 482 1889 Proof-65/Proof-60. Brilliant obverse; toned reverse.
- 483 1890 Proof-65/Proof-60, similar.
- 484 1891 and 1892. Proof-60, dull irregular toning on both. (Total: 2 pieces)
- 485 1893 Proof-65/Proof-60, obverse fully brilliant; reverse toned.
- 486 1894, 1895, 1896, 1897, 1899. Proof-60 to Proof 63, some partly brilliant, others with heavy toning. (Total: 5 pieces)
- 487 1900 Proof-65/Proof-60, light olive toned obverse; darker reverse.
- 488 1901 Proof-65/Proof-60, similar.
- 489 1902 Proof-65/Proof-60, similar.
- 490 1903 Select Proof-63, mostly brilliant.
- 491 1904 MS-63, Select Uncirculated, much original mint red. This piece, along with the similar Unc. Indians below were donated to the Springfield Library around 1954 by members of the Springfield Coin Club. Essentially all of the coins in this collection dated after 1907 come from the same source.
- 492 1904 Proof-60, cleaned.
- 493 1905 Choice Proof-65, brilliant, one obverse spot.
- 494 1905 MS-65, Choice Brilliant Uncirculated.

- 500 1909 Indian. MS-60, Uncirculated with light toning.
- 501 Lincoln cents: 1909-VDB, and one of each Philadelphia date 1909-1920. Generally AU-50 to MS-60 Unc. , some with faded lustre. (Total: 13 pieces)

## Nickel Three-Cent Pieces

### 1865 Breen 2-B

- 512 **1865 Breen 2-B, double date, plain on 6. Select Brilliant Proof-63.** first year of this denomination and scarce with only 400 pieces struck.
- 513 1866 Select Brilliant Proof-63.

- 514 **1867 Choice Brilliant Proof-65,** planchet striations in centers, as made.
- 515 1868 Proof-60, light tarnish, few lintmarks.
- 516 1869 Select Brilliant Proof-63. Light tarnish on parts of obverse, otherwise a gem.
- 517 1870 Proof-60, light obverse tarnish.
- 518 1871 Proof-60, tarnished and dull.
- 519 1872 Select Proof-63, light obverse tarnish.
- 520 1873 Select Proof-63, obverse streaking.
- 521 1874 Proof-60, dull on reverse.
- 522 1875 Proof-60, irregular obverse tarnish, as on many of these.
- 523 1876 Proof-60, cleaned.

### 1877 Nickel Three-Cent Piece

- 524 **1877 Select Proof-63**, some irregular obverse tarnish. The key date. About 510 pieces struck, all in Proof.

- 525 **1878 Select Proof-63**, minor obverse tarnish, some spotting on reverse. Proof-only date and very popular.
- 526 **1879 Select Brilliant Proof-63**. Variety with filled 9 in date.
- 527 **1880 Proof-60**, nick on throat.
- 528 **1881 Select Proof-63**, mostly brilliant.
- 529 **1882 Proof-60**, toned, some tarnish.
- 530 **1883 Select Brilliant Proof-63**.

- 531 **1884 Choice Brilliant Proof-65**, light obverse tarnish, otherwise a beauty.
- 532 **1885 Proof-60**, streaky.
- 533 **1886 Proof-60**, light tarnish.
- 534 **1887/6 Select Proof-63**, brilliant, light obverse tarnish.
- 535 **1888 Select Proof-63**, an exact twin to the preceding.
- 536 **1889 Proof-60**. Also a group of silver three-cent pieces 1851-1858, one of each date, no 1851-O. These are Good-Fine. (Total: 9 pieces)

## Silver Three-Cent Pieces

- 537 **1859 Type 3**, as are all to follow. **Choice Proof-65**, deeply iridescent.
- 538 **1860 Select Proof-63**, blue toning. Obverse pinscratch and a few light lintmarks, otherwise a choice original piece.

- 539 **1861 Choice Proof-65**, deep blue-gray with russet tones around borders.

- 540 **1862 Choice Proof-65**, mottled deep blue-gray tarnish.

- 541 **1863 Proof-60**, mottled toning, few tarnish spots on obverse.

- 542 **1864 Choice Proof-65**, beautifully mottled in light blue and pink pastels.

- 543 **1865 Choice Proof-65**, gorgeous mottled iridescent toning with the obverse shield a rich, glowing green. Variety with die crack left of date.

(See Color Photo)

- 544 **1866 Restrike**. A most extraordinary piece. Struck with bent dies so that the flan is markedly concave. Also there is an unnaturally high irregular wire rim around the left half of the obverse. **Choice Proof-65**, magnificent green and russet iridescence. Possibly struck as late as 1871; nothing like this listed in Breen, first we've seen.

- 545 **1867 Choice Proof-65**, green-rose iridescence with the reverse a light sky-blue. Another beauty that must be seen to be appreciated.

- 546 **1868 Choice Proof-65**, similar to last, but the obverse colors are even more vivid. These last three are of a quality seldom seen today.

- 547 **1869 Choice Proof-65**, fantastic pink and green obverse toning; light blue-gray on the reverse.

- 548 **1870 Select Proof-63**, streaky gray toning.

- 549 **1871 Choice Proof-65**, mottled gray-blue tints.

- 550 **1872 Choice Proof-65**, light original iridescence of the kind that only decades can produce; the difference between these and the artificially toned silver coins often met with today is obvious.

- 551 **1873 Select Proof-63**, steel-gray. Last year of this highly interesting denomination, and doubly popular as a scarce proof-only date.

## Nickels

(See Color Photo)

- 552 **1866 Rays. Choice Brilliant Proof-65**, odd planchet defect on obverse rim at 8:30 extending into field below leaf tip. High wire rims and nearly a full strike. From the proof-only dies with the bold center dot on obverse and reverse, as listed in Breen. **Very rare**, not over 175 of these made, of which possibly two-thirds survive today, most of them not equal to the present piece in terms of quality. One of the most difficult of all U.S. type coins to obtain in proof, as there are only two dates to choose from, and the 1867 with rays is an extreme rarity. Gem Uncirculateds of this type have sold at \$3500 or higher recently; this Proof is dozens of times rarer!

- 553 **1867 Rays. MS-60**, Uncirculated, dull, irregular streaky toning.

- 554 **1867 No rays**, type of 1868-1883. **Choice Brilliant Proof-65**.

- 555 **1868 Select Brilliant Proof-63**.

- 556 **1869 Choice Brilliant Proof-65**.

- 557 **1870 Proof-65/Proof-60**, brilliant obverse, dull reverse, as on many of these.

- 558 **1871 Choice Brilliant Proof-65**.

- 559 **1872 Choice Brilliant Proof-65**, a beauty!

- 560 **1873 Select Brilliant Proof-63**, very faint obverse planchet defect across shield.

- 561 **1874 Choice Brilliant Proof-65**.

- 562 **1875 Choice Brilliant Proof-65**.

- 563 **1876 Choice Brilliant Proof-65**.

### 1877 Nickel

- 564 **1877 Select Brilliant Proof-63**, full mirror surfaces; kept out of the gem category by a few minute rim nicks, and a very faint obverse scratch. Rare, key date; only about 500 struck, all as proofs. Like the other minor denominations, these were never struck for circulation due to a backlog of coins in the Treasury vaults.

- 565 **1878 Select Brilliant Proof-63**, few minute flyspecks and a couple of tiny rimnicks, but basically above average, as many of these are dull.

- 566 **1879 Choice Brilliant Proof-65**.

567 1880 Choice Proof-65 with light toning.

568 1881 Choice Brilliant Proof-65, really choice.

569 1882 Choice Brilliant Proof-65, lightest iridescent toning.

570 1883 Shield. Choice Brilliant Proof-65, with choice light steel-blue toning; the most desirable color for a proof nickel.

571 1883 Liberty. No CENTS. Select Brilliant Proof-63, few light flyspecks, otherwise original and choice.

572 1883 Liberty type. No CENTS. MS-65, Brilliant Uncirculated.

573 1883 With CENTS. Choice Brilliant Proof-65, small stain on neck.

574 1884 Choice Brilliant Proof-65, a few inevitable flyspecks, but a choice original piece.

575 1885 Select Brilliant Proof-63. Choice light blue toning, and really a full Proof-65 except for a faint, almost imperceptible obverse pinscratch. Scarce date.

576 1886 Proof-65/Proof-60. Again the split grade is necessitated by the fact that the obverse is brilliant and lovely, while the reverse has turned dull.

577 1887 Select Brilliant Proof-63, mottled gold toning on obverse.

578 1888 Proof-65/Proof-60, brilliant. Obverse is choice, but the reverse is spotted.

579 1889 Select Brilliant Proof-63, light flyspecks, and a shallow obverse planchet chip, as made. This is very common on nickels, although it is seldom mentioned.

580 1890 Proof-65/Proof-60, mostly brilliant.

581 1891 Proof-65/Proof-60, brilliant.

582 1892 Proof-65/Proof-60, brilliant.

583 1893 Brilliant Proof-60.

584 1894 Select Brilliant Proof-63.

585 1895 Select Brilliant Proof-63. Choice surfaces, but spotted. This can probably be cleaned up nicely.

586 1896 Proof-65/Proof-60.

587 1897 Proof-65/Proof-60.

588 1898 Select Brilliant Proof-63. Few light obverse scratches, otherwise choice.

595 1905 Choice Brilliant Proof-65.

596 1906 Choice Brilliant Proof-65.

597 1907 Choice Brilliant Proof-65.

## Half Dimes

598 1794 Good-4 or better, old iridescent toning and free of defects.

599 1795 VG-8, but bent. Reverse die rotated 90 degrees to right, which is unusual.

### 1800 Half Dime

600 1800 VF-20, lightly toned with traces of mint lustre in a few protected areas near rims. Defect-free example of this difficult type.

601 1805 Poor condition, heavily worn, bent. Strictly a filler.

602 1829 Capped bust by Kneass. Valentine-7. Choice AU-55, full mint lustre.

603 1831 VF-20 and 1834 Fine-12. (Total: 2 pieces)

604 1832 V-1. MS-63, Select Uncirculated, natural brilliance subdued by light mottled brown and blue tones, mostly on obverse. Weak impression at rims, sharp in centers.

605 1833 V-1. EF-40, lightly toned, some mint lustre.

606 1835 V-3. Large date; large 5C, extra bold period. Type of 1834. MS-60, Uncirculated, mostly brilliant. Edge reeding nearly absent in large sections; very unusual and presumably a misalignment of the edge collar.

607 1836 V-4. Large 5C, U recut, O in OF much too low, A too close to F. EF-40, light natural iridescence.

608 1837 Bust type. EF-40, irregularly tarnished, traces of lustre.

609 1837 Seated type. Small date. AU-50, gold toned, traces of lustre on obverse and over much of reverse. Heavy die break at first A in AMERICA.

610 1838 Stars, no drapery. MS-65, glittering brilliant proof-like Uncirculated gem, touch of light gold toning around part of obverse border, fully struck up. A prize example of this fairly difficult type.

611 1839 V-2, with the 9 in date sharply double-punched. EF-40 with warm gray toning.

612 1840 AU-50, toned, but slightly bent.

613 1841 and 1842. Both Choice EF-45. First with blue toning and traces of prooflike lustre; second deeply toned with flashes of brilliance and the reverse die heavily shattered through the right side. (Total: 2 pieces)

614 1843 AU-50, deeply iridescent with flashes of prooflike brilliance; never cleaned or dipped, like most of these.

615 1844 AG-3 and 1846 Good-4. Scarce dates. (Total: 2 pieces)

616 1845 EF-40 and 1848 medium date, Choice EF-45. Both with light toning and some lustre. (Total: 2 pieces)

617 1847 MS-63, Select Brilliant Uncirculated, average strike with mostly choice surfaces.

618 1849/6 MS-63, Select Uncirculated, mostly brilliant with some light warm mottled tones. 9 in date first punched into die upside down, then corrected. The counterpart to such blunders as the 1809/6 half cent or the 1806/9 half dollar. Curve of 6 shows under right half of 9; reverse die shattered in many places, including an arc from N to first S in STATES. Seldom offered!

619 1850 Choice AU-55, much lustre with a touch of pale gold toning on obverse.

620 1851 Choice AU-55, full mint lustre and really never in circulation, but it has the lightest rubbing on the high points of the obverse.

621 1852 and 1853 no arrows. Both toned EF-40. Also 1853 with arrows. VF-20, toned. (Total: 3 pieces)

622 1854 and 1855. AU-50, beautifully toned, much underlying mint lustre; clashed dies on both. Popular arrows type coins. (Total: 2 pieces)

623 1856 VF-20 and 1857 Choice EF-45. Colorful toning on the 1857. (Total: 2 pieces)

624 1858 Choice AU-55, lightly toned lustrous beauty with just a touch of faint friction on the obverse.

625 1859 New obverse hub, and strictly a separate type. Choice Proof-65 with the most gorgeous light iridescent obverse toning imaginable; reverse fully brilliant. Rare, Breen estimates about 60-100 pieces known in proof. A splendid prize.

626 1860 Select Proof-63, light irregular iridescent pastels, much brilliance.

627 1860 Duplicate. Also Select Proof-63, uniform pale gold toning.

628 **1861 Choice Proof-65**, mainly brilliant and fully so on the reverse; colorful toning irregularly distributed along part of obverse rim.

629 1862 Select Proof-63, violet toning on part of obverse; brilliant on reverse.

630 **1863 Choice Proof-65**, mottled lavender tones. V-1, recut 1 in date; die of the originals.

631 **1864 Select Proof-63**, mostly brilliant, green-gold tones in some areas. Extremely popular date because of the rarity of business strikes.

632 **1865 Choice Brilliant Proof-65**. Early state of V-1 die with 865 in date filled.

633 1866 Proof-60, light toning.

634 1867 Proof-60, blue toning, once cleaned.

635 1868 Proof-60, also cleaned.

636 **1869 Choice Brilliant Proof-65**, faint obverse hairlines; reverse perfect.

637 1870 Select Proof-63, light hairlines, mostly brilliant.

638 **1871 Choice Brilliant Proof-65**, iridescent toning around the borders. V-1, with the rusted state of the obverse die.

639 1872 Proof-60, cleaned.

640 1873 Select Proof-63, mottled violet and brown toning.

## Dimes

### 1796 Hilt 3-C

641 **1796 Hilt 3-C (R-6).** Draped bust, small eagle type. Star distant from curl; berry right of D in UNITED. **VF-20**, gray toning, well handled, but generally free of defects except for a small cut on rim near U. The 1680 pieces delivered March 30, 1796 are believed to comprise this variety.

642 1800 Fine-12, plugged at 12:00; also 1801 Fine-12, but holed at 12:00. Rare dates. (Total: 2 pieces)

643 1802 Breen 1-A, the famous needle beak. Strict Good-4, toned, no problems. Lower prong of beak extends all the way through star and beyond; this reverse later used briefly in 1804. Average condition for these.

644 **1805 Fine-12 or better**, full motto on reverse. Natural iridescent gray tones and no defects. Could bring close to the full VF price.

*Note: Large stars on reverse, 5 berries, type of 1807. 120,780 pieces struck of the date from a single obverse die and two reverse dies (the other reverse has small stars and 4 berries, like in 1797-1804). No dimes were struck in 1806, but an 1806 obverse die may have been prepared, as one was listed in the Mickley estate (assuming this was not a typographical error). Many of the 1805 dimes could not be distributed by the mint; this explains why the phantom 1806 die was never used.*

645 **1807** Only the single variety. **Strictly Fine-12**, although this could be graded VF/VG, the difference being due to die failure. Steel toning with attractive russet and green at the borders, completely problem-free.

646 1809, 1820, 1823/2, 1824/2. First is AG-3, the others grade G-4—VG-8. Light toning on all. (Total: 4 pieces)

647 1814 Large date; period after 10C, closed base to R in AMERICA. EF-40, irregular tarnish. Reverse die rotated 45 degrees to the left.

648 **1821** Large date, spaced 18 21, bold center dot, 8th star nearly touches cap and border; Second S in STATES high and crowded in close to OF. **AU-50**, beautifully toned to sea-green and gold, some underlying lustre, better than average strike for the date. Some old light scratches above head of eagle are nicely hidden by the colors. These early dimes are difficult to find this attractive; we still think they are undervalued compared to the capped bust quarters.

649 1825 Close date; A very distant from arrow. EF-40, toned, flashes of brilliance around stars, usual soft strike.

650 1827 Wide date, 18 leans sharply right, 27 higher. Choice EF-45, beautiful old deep iridescent gray toning. Except for a small obverse abrasion before the nose, this is perfect for the grade.

651 1829 Small 10C. Choice EF-45, blue-green and gray iridescence, much prooflike surface.

652 1830/29 Late state with most of overdate gone; medium O in 10C. EF-40, irregular blue-gold tarnish.

653 1831 Triple lines in shield, as in 1828-1830. EF-40 with medium gray toning.

654 1832 High 2 in date; RI joined. **AU-50**, choice toning with light iridescent on obverse and blue-green tints over reverse; underlying prooflike lustre.

655 1833 Final 3 high. Choice EF-45, gray and gold toning, underlying lustre.

656 **1834 Large 4 in date**; 10C widely spaced. **Huge D in UNITED**, evidently from the half-cent punch. **AU-50**, gorgeous greenish gold and silvery gray tones with underlying lustre. This blundered reverse was discovered by Breen in 1975 while cataloguing Pine Tree's 5/76 auction; that coin was listed as Uncirculated (Lot 172). Many others have been cherry-picked in the last few years, but these are all VF or worse. One for the dime collectors to fight about!

657 1835 Tall O in 10C, as in 1830-1835. Choice EF-45 with beautiful iridescent toning.

658 1836 Choice AU-55, obverse with olive-gold toning; reverse with natural silvery brilliance, much mint lustre.

659 1837 Bust type. 8th star far from cap; small O in 10C as on the 1835-1836 coins. **AU-50**, steel toning with mottled iridescence, rim nick at 12:00 obverse, plenty of mint lustre.

660 1837 Bust type. Large date, flat top on 3. Choice AU-55, mostly brilliant with light toning near rims. Popular as a type coin.

661 1838 Normal large stars. Choice AU-55, lustrous and brilliant, couple of obverse nicks.

662 **1838-O No stars. AU-50**, much lustre, natural silvery brilliance (not like the shiny kind typical of dipped coins). No recutting on base of mintmark. Rare in this condition; these are usually seen G-VG, seldom better. Many of the otherwise VF and EF coins are very porous and discolored.

663 1839 EF-40, steel gray, some lustre.

664 1840, 1842, 1843. All VF-20 to Choice VF-30. (Total: 3 pieces)

665 1841-O Small O mintmark. Fine-12, light toning. Above average.

666 1844 VF-20, light toning. Scarce popular date, only 72,500 minted.

667 1845 and 1848. EF-40. Also 1847 Fine-12. (Total: 3 pieces)

668 1846 Choice VF-30, steel toned. Very scarce with only 31,300 struck; unobtainable above EF.

669 **1849 MS-60, Brilliant Uncirculated**, usual faint contact marks, but about as nice as they come. Date heavily logotyped into die.

670 1850 Choice AU-55, full lustre, and claims to Uncirculated.

671 1851, 1852, 1853 no arrows. All VF-20 and lightly toned. The 1853 is scarce. (Total: 3 pieces)

672 1853 Arrows at date. Choice AU-55, full mint lustre.

673 1854 Arrows. AU-50, much lustre; lightly toned.

674 1855 Arrows. Choice AU-55, nearly full lustre, naturally brilliant.

675 1856 Small date. Choice AU-55 with plenty of mint lustre.

676 1857 VF-20 and 1858 Fine-12. (Total: 2 pieces)

### **Dazzling 1859 Dime**

677 **1859 Dazzling Choice Proof-65 gem** with brilliant fields ringed by blue iridescence at the borders.

678 **1860 Choice Brilliant Proof-65**, lightest hairlines.

679 **1860 Choice Brilliant Proof-65**, another, and choicer than last.

680 1861 Select Proof-63, only the lightest obverse hairlines.

681 1862 Select Brilliant Proof-63, similar.

682 1863 Select Brilliant Proof-63, light hairlines.

683 **1864 MS-60, Brilliant Uncirculated, fully prooflike**. A most unusual piece in that it has full proof surfaces but is very weakly struck at head, legend, rock and outer leaves of wreath, so much so that this is technically either a mint error or a set-up die trial piece. As to the important question as to whether this is a proof or a business strike this is very difficult to answer. The mirror surfaces are equal in depth to a proof and display many tiny lintmarks like on a proof. However there is no question that this was struck only once, and weakly so at that, also the edge serrations are blurry and weak, and not at all like those on a proof. Die characteristics are no help as both proofs and business strikes are from the same pair of dies. Therefore we are forced to attribute this as a regular circulation strike, even though we admit there is a possibility that this coin was once part of an 1864 proof set, as the other 1864 coins in this collection are all proofs. Two numismatists could argue far into the night on this, but whatever it is, it is rare, as only 11,000 regulars and 470 proofs were made of this date. If the present strike is typical of the regular 11,000, this would explain why this date is usually seen in proof, prooflike Unc., or well-worn G-VG; VF and EF pieces are unobtainable.

684 1865 Select Brilliant Proof-63, tiny scrape in obverse field, otherwise choice.

685 **1866 Choice Brilliant Proof-65**, a beauty!

686 **1867 Choice Brilliant Proof-65**.

- 687 1868 Select Brilliant Proof-63, few light hairlines.
- 688 1869 Select Brilliant Proof-63, light hairlines and a couple of nicks above the rock.
- 689 1870 Brilliant Proof-60, light hairlines from a cleaning, but mirror surfaces intact. The weak strike at the head is typical of this date.
- 690 1871 Select Brilliant Proof-63, only the lightest of hairlining.
- 691 1872 Select Brilliant Proof-63, very similar.
- 692 1873 No arrows. Select Brilliant Proof-63, couple of minute obverse field nicks.

- 693 1873 With arrows. Select Brilliant Proof-63, faint obverse hairlines. Popular type coin, like the next.

- 694 1874 Arrows. Select Brilliant Proof-63, faint hairlines on obverse.

- 695 1875 Choice Brilliant Proof-65, touch of light iridescence at top of obverse.
- 696 1876 Select Proof-63. Cleaned, but full mirror surfaces have survived.
- 697 1877 Proof-60, dull, cleaned.
- 698 1878 Select Brilliant Proof-63.

- 699 1879 Choice Brilliant Proof-65 with some light iridescence developing. Very popular.

- 700 1880 Choice Brilliant Proof-65, single nick in left obverse field, otherwise a gem.

- 701 1881 Choice Brilliant Proof-65, few tiny lintmarks, as made, toned at rims.

- 702 1882 Choice Brilliant Proof-65, like the 1879.

- 703 1883 Choice Brilliant Proof-65, an outstanding coin.

- 704 1884 Choice Brilliant Proof-65, not fully struck up at the head.
- 705 1885 Select Brilliant Proof-63, similar, couple of faint scratches in field.
- 706 1886 Choice Brilliant Proof-65, a top-quality gem, the best money can buy.
- 707 1887 Proof-60, dull gold toning.
- 708 1888 Select Brilliant Proof-63, few light abrasions in fields, light obverse border toning.
- 709 1889 Select Brilliant Proof-63.
- 710 1890 Proof-60, cleaned, retoning back.

- 711 1891 Choice Proof-65, mostly brilliant, mottled obverse toning developing.

## Outstanding Group of Proof Barber Dimes

The following group of Barber dimes in Proof contains many splendid pieces of a quality seldom seen on the market today. Most Proof (and Unc.) Barber coins of all three denominations exhibit light slide marks on the cheek. These result from the use of slide type coin albums. When the slides are pulled back and forth they tend to rub across the highest part of the coin, which in the case of the Barber design is the cheek of Liberty. The selection of dimes below has never been in one of these holders, and so is free from this type of friction. The grading is, as usual conservative. The pieces listed as Proof-65 are virtually perfect and could easily be called Proof-67 or Proof-68, as some of our more enthusiastic competitors are fond of doing. The ones listed as Proof-67 appear to be perfect under an 8X glass; the only reason we have not called them Proof-70 is that some fanatical soul might claim to have found a flaw under a 30X microscope or something similar, but they fully meet the ANA criteria for Proof-70.

712 **1892 Choice Proof-65**, beautiful olive-gold toning at obverse border, otherwise brilliant.

713 **1893 Choice Brilliant Proof-65**, some pale gold toning at obverse border.

714 **1894 Gem Brilliant Proof-67**, light toning at borders. A real beauty!

715 1895 Proof-60, dull, cleaned.

716 1896 Proof-60, dull toning, once cleaned.

717 **1897 Choice Brilliant Proof-65**, touch of light obverse iridescence.

718 1898 Would be Proof-65 but this has been ruined by several light, but obvious scratches across the obverse.

719 **1899 Gem Brilliant Proof-67**, light irregular tones in places. Another jewel.

720 **1900 Choice Brilliant Proof-65**.

721 1901 Proof-60, harshly cleaned.

722 1902 Choice Brilliant Proof-65

723 **1903 Choice Brilliant Proof-65**

724 **1904 Gem Brilliant Proof-67**, a finer proof Barber dime does not exist.

725 **1905 Gem Brilliant Proof-67**, another splendid gem.

726 **1906 Choice Brilliant Proof-65**.

## Quarters

727 1907 Choice Brilliant Proof-65.

## Twenty-Cent Pieces

728 1875 Proof-60, signs of an old cleaning, toning back naturally and quite attractive.

729 1876 Select Proof-63, not fully struck on the obverse device. Deep blue and violet tones over full mirror surfaces.

### 1877 Twenty-Cent Piece

(See Color Photo)

730 1877 Select Proof-63, beautiful green, pink and blue iridescence over mirror surfaces. Rare, only 350 pieces struck, all in proof, but some of these melted after 1878 as unsold, leaving possibly as few as 300 actually released.

### 1878 Twenty-Cent Piece

(See Color Photo)

731 1878 Select Proof-63, very similar to the 1877. Another proof-only date; about 500 of these actually released.

### 1796 B-2 Quarter

732 1796 B-2, 6 high in date, the usual variety. VF-20, but a tragedy! This was hit a half-dozen times with a blunt object in the center of the reverse. The obverse is pleasing however, and the piece will still bring \$3000 or more.

733 1804 B-1. More or less Good-4 though it could be argued that a few details in the center of the reverse rate VG. Very weak at reverse border with ERICA worn away. Only 6,738 pieces struck, seldom offered today in any grade.

734 1805 B-2 (5 in date touches bust; gap in denticles above E in STATES). Choice VF-30, weak impression on obverse, but many details surely EF. Steel gray with a light iridescence at borders, and some mint lustre. A grossly undervalued date for years; above VF this is many times rarer than 1796 and nearly as rare as 1804. Yet it is valued at about the same as the common 1806 and 1807. The present specimen is certainly worthy of a bid of \$2000 or more.

735 1806 B-2 (Foot of 1 in date, I and T in LIBERTY all defective; C touches A in AMERICA). Choice VF-30, a twin to the above 1805 in sharpness, strike and color. Early classic coins such as this are getting rarer each year.

736 1807 B-1 (Small 0 in date; 4 berries). AG-3, reverse fully Good-4. Natural iridescent gray, and mostly defect-free.

737 1815 B-1. VG-8, toned, few minor scrapes and scratches but nothing serious. Perennially underrated; just about as rare as the half dollar of this date.

738 1818 B-2 (13th star recut, arc break over head; scroll begins under upright of D). **Choice EF-45**, warm gold toning, underlying lustre, nick on cheek. From the late die state with heavy triple clash marks.

*Note: Common variety, like B-1, 3, 4. The other varieties are seldom seen in any grade. This particular obverse die has an interesting later history. It was sold by the mint as scrap (possibly during the move to the Second U.S. mint in 1833). But it ended up in the hands of numismatists, and was resurrected in 1862 and muled with the reverse of a Randall hoard cent of 1818 (Newcomb-8) to produce a real monstrosity: a "coin" with the obverse of an 1818 quarter and the reverse of an 1818 cent, struck in silver using an 1860 seated quarter as a planchet! This curious item, which has been occasionally misdescribed as a "pattern", was in our stock several years ago.*

739 1819 B-3 (small 9 in date; 25 C double punched). **EF-40**, light toning, some lustre. The most common variety of the date, but very popular because of the blundered reverse die (colon after 25C; really a double punched period).

740 1820 B-1. (Large 0 in date, extra long serif on 1; 25C placed high). Strict Fine-12 with light gray toning.

741 1821 and 1822. These grade VF-20 or better but both are damaged. The 1821 is holed and plugged at 12:00, and the 1822 has a less serious attempted puncture on the reverse. (Total: 2 pieces)

742 1825/3 B-2, late state, overdate gone. VG-8, natural greenish steel toning.

743 1828 B-2, reverse of 1824. VF-20, gray toning, once cleaned. Very scarce variety, probably still R-5.

744 1831 The Kneass design. B-4 (Small date, 8th star far from cap; small letters, no berries, crack through C of value). **AU-50**, plenty of mint lustre, beginnings of a light steel tone.

745 1832 B-2, short arrowheads. VF-20, light steel gray, few traces of proof-like surface. As a date many times rarer than 1831.

746 1833 B-1, period after 25C. Fine-12, gold-gray toning.

747 1834 B-4 (8th and 10th stars recut; 25 colse, 5C very distant, second T in STATES low). **Choice AU-55**, nearly full lustre, antique gold and blue tones at rims, probably never in any real circulation, but it has enough light friction on a few of the hair curls to take it down to Choice AU-55. Shattered state of the reverse die with multiple breaks, including the vertical crack down from right wingtip. At least a full grade better than the Bergen coin.

748 1835 B-1 (3 in date much too high; reverse of 1834, B-3). **AU-50**, some lustre, gold toning. Latest state of the dies with the horizontal crack through 5 in the date.

749 1836 and 1837. Both Fine-12 with light gray toning. (Total: 2 pieces)

750 1838 Bust type. B-1, the only variety. Choice VF-30 overall. Sharpness of EF-40, but the surfaces do not qualify as there are a couple of old nicks and little or no lustre.

751 1838 Seated type. Choice EF-45, rich antique gold toning, much underlying lustre.

752 1839 **Choice AU-55**, brilliant, near full lustre. Reverse die cracked in half horizontally from T to R. Reverse from the 1838 hub with open claws. Scarce date in choice condition, seldom seen finer. An excellent type coin.

753 1840-O With drapery. EF-40, toned, signs of an old cleaning. Scarce, not equalled very often.

754 1842-O Large date, like in 1843. Choice EF-45, light steel toning and faintly prooflike.

755 1843 EF-40 but harshly cleaned.

756 1844 **Choice AU-55**, irregular light toning, much lustre.

757 1845 EF-40, gold toning, some lustre.

758 **1846 Choice AU-55**, brilliant, near full lustre. Obverse with light cracks through stars.

759 1847 AU-50, lightest gold toning, and semi-prooflike surfaces.

760 1848 VF-20, light toning.

761 1849 Choice EF-45, steel gray. The common variety with the first vertical stripe of reverse shield incomplete at top.

762 1850 AU-50, irregular deep streaky tarnish.

763 **1851 Choice AU-55**, brilliant, faint signs of an old cleaning, but this is not serious as the coin has nearly full mint lustre, and actually has strong claims to the Uncirculated class. Rare in this condition; unobtainable in gem condition, though this fact is not generally known.

764 1852 Strong Fine-12, blue-gray toning.

765 1853 Arrows and rays. Choice EF-45, silvery-gray toning, abrasion above head of eagle.

766 **1854 Arrows; no rays. MS-63, Brilliant Uncirculated, frosty**, lightest gold toning. First stripe on reverse shield incomplete at top, as on many of this date. Very popular two-year type coin. Now is the time to buy these pieces while prices are low.

767 1855 Arrows. AU-50, lightly toned, considerable lustre.

768 1856 EF-40, light toning.

769 1857 Choice AU-55, mostly brilliant, much lustre.

770 1858 Choice EF-45, light gray toning, some lustre.

771 **1859 Select Brilliant Proof-63**, few tiny spots and a couple of faint hairlines on the reverse.

772 **1860 Select Brilliant Proof-63**, like the 1859 with a few more hairlines. All of these pre-1866 quarters are scarce in perfect Proof; the pieces offered here are no different than those routinely sold as "Proof-65".

773 **1861 Select Brilliant Proof-63**, partly cloudy on reverse, few spots and scattered hairlines.

774 **1862 Select Brilliant Proof-63**, two large carbon spots on the reverse; when these are removed the grade will be upped to Proof-65.

775 **1863 Select Brilliant Proof-63**, tiny dent in obverse field near the 10th star.

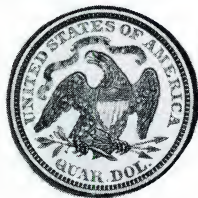

776 **1864 Select Brilliant Proof-63**, faint hairlines.

777 **1865 Select Brilliant Proof-63**, essentially choice; the hairlines are very faint and well-scattered.

778 **1866 With motto. Select Brilliant Proof-63**, very faint hairlines.

779 **1867 Select Brilliant Proof-63**.

780 **1868 Select Brilliant Proof-63**.

781 **1869 Select Brilliant Proof-63**, light hairlines, struck from a lightly rusted reverse die. About as nice as they come; all of these should be examined.

782 **1870 Select Brilliant Proof-63**, heavily rusted reverse die.

787 **1874 Arrows. Choice Brilliant Proof-65**, few faint obverse hairlines but far above average. Same reverse die as the last three pieces.

788 **1875 Proof-60**, cleaned, light hairlines, mirror surfaces mostly intact.

789 **1876 Proof-60**, cleaned, mostly cloudy.

790 **1877 Select Brilliant Proof-63**, a gem except for a cloudy area over the top third of the reverse.

783 **1871 Choice Brilliant Proof-65**, identical rusted reverse die to the last. This is listed in Breen, but strangely he fails to mention the use of this reverse in 1870 and possibly earlier.

791 **1878 Choice Brilliant Proof-65**, about as nice as they come.

784 **1872 Choice Brilliant Proof-65**, the lines on the reverse are not hairlines but die finishing lines. All 1872 proofs have them, and they are typical of proofs of this era.

792 **1879 Select Brilliant Proof-63**, light hairlines, cloudy area along part of reverse rim. Highly popular date because of the low reported mintage of both business strikes and proofs. In reality no rarer in Proof than other dates 1880-1888.

793 **1880 Proof-60**, heavily cleaned obverse, reverse much nicer.

794 **1881 Select Brilliant Proof-63**, lightest obverse hairlines; the usual quality sold as "Proof-65" today.

785 **1873 No arrows. Select Brilliant Proof-63**, faintest obverse hairlines.

795 **1882 Choice Brilliant Proof-65**, couple of tiny flan chips, as made, but still a real beauty.

786 **1873 With arrows. Select Brilliant Proof-63**, twin to the last. Highly popular as a type coin.

796 **1883 Choice Brilliant Proof-65**, as nice as they come.

797 **1884 Select Brilliant Proof-63**, scattered light hairlines.

- 798 1885 Select Brilliant Proof-63, free of hairlines, but slightly cloudy on part of obverse. This one may be improvable.
- 799 1886 Select Brilliant Proof-63, only the lightest hairlines.
- 800 1887 Proof-60, toned, dull, mostly cloudy.
- 801 1888 Select Brilliant Proof-63, some faint gold toning. Average quality proof.
- 802 1889 Select Brilliant Proof-63, light hairlines.

- 803 1890 Choice Brilliant Proof-65, couple of faint stains on obverse.
- 804 1891 Select Brilliant Proof-63, hairlines on obverse.
- 805 1892 Barber. Select Brilliant Proof-63, partly cloudy on reverse.

- 806 1893 Choice Brilliant Proof-65, lightest gold toning. A lovely example of the type.
- 807 1894 Choice Brilliant Proof-65. Far above the usual rubbed, hairlined examples.

- 808 1895 Choice Brilliant Proof-65, couple of removable spots on the reverse rim.
- 809 1896 Select Brilliant Proof-63, couple of faint scratches in left obverse field, otherwise a gem.
- 810 1897 Select Proof-63, mostly brilliant, beginnings of an antique gold tone on the obverse.
- 811 1898 Select Brilliant Proof-63, light tarnish in a couple of places.
- 812 1899 Select Brilliant Proof-63, minor cloudiness on part of reverse.
- 813 1900 Select Brilliant Proof-63, lightly cleaned obverse, reverse is choice.
- 814 1901 Select Brilliant Proof-63, few faint obverse hairlines.

- 815 1902 Choice Brilliant Proof-65, a premium example!

- 816 1903 Choice Brilliant Proof-65.

- 817 1904 Choice Brilliant Proof-65.

- 818 1905 Choice Brilliant Proof-65.

- 819 1906 Choice Brilliant Proof-65.

- 820 1907 Choice Brilliant Proof-65.

## Half Dollars

- 821 **1836 Reeded edge; dies by Gobrecht. Choice VF-30**, lightly toned, free of defects. Always a popular item due to the listed mintage of just 1,200 pieces. Strictly a pattern like the 1856 flying eagle cent, as the legislation authorizing the reduced weight was not signed into law until early the following year. But it is a near certainty that more pieces dated 1836 were struck in 1837, and these would therefore be regular issues. But if these are regarded as regular issues the same must be done with the earlier pieces struck from the same dies. In addition the coin is usually seen worn proving that it circulated as a regular issue for decades.
- 822 **1837 AU-50**, light gray toning, underlying brilliance, much lustre. Far better than average strike for this date, which is often weak at the rims. Diameter 30.5 mm; coarse edge reeding, like on the 1838.
- 823 **1838 New type with denomination spelled out as HALF DOL. AU-50**, twin to the above 1837 except for a minor nick on the cheek.

- 824 **1839-O Bust type. AU-50**, lightly toned, much lustre. Really attractive, but marred by some heavy, though localized scraping on reverse under NI. Intensely popular as the only branch mint coin of this design, the first collectible New Orleans half dollar (the 1838-O is extremely rare), the only collectible half dollar with the mintmark on the obverse, and also its resemblance to the famous 1838-O.
- 825 **1839 Seated. First design, without drapery from elbow. VF-20**, light gray toning, the usual weak strike in the center of the reverse as on all we have seen of this variety.
- 826 **1840 Small letters. EF-40**, lightly toned and faintly prooflike.
- 827 **1841-O Medium O mintmark. AU-50**, naturally brilliant, much lustre, and a far above average strike for this normally weak date. Reverse die cracked from first S in STATES down to beak.
- 828 **1842 Large date and letters. AU-50**, lustrous. Blue toning near the rims.

- 829 **1843 MS-60, Brilliant Uncirculated**, toned near rims and on edges.

Amazing prooflike reverse with the die heavily broken in several places around the legends and into the field above the eagle. A few localized weaknesses from the collapsing die. Interesting and doubtless rare, as this die would have had to have been condemned promptly.

- 830 **1844 EF-40** with some lustre.
- 831 **1845-O AU-50** with considerable lustre, especially over the reverse. Few small obverse abrasions above the head.
- 832 **1846 Tall date, same date punch as on the 1846 large date cent. Choice EF-45** with light gray toning.
- 833 **1847 AU-50**, mostly brilliant.
- 834 **1848-O Choice EF-45**, lustrous, lightly toned. Open 4 in date, as on most of these.
- 835 **1849-O EF-40**, well handled, dull faint scratch down from beak to N. Traces of prooflike lustre. Uncommon date.
- 836 **1850-O Normal open 5 in date. Choice AU-55**, near full lustre, light toning at the rims.
- 837 **1851-O EF-40**, sharp, but harshly cleaned and with a few rimnicks.
- 838 **1852 EF-40**, light toning and scattered tarnish. Only 77,130 pieces struck.

- 839 **1868 Choice Brilliant Proof-65**, few light hairlines well scattered. Evidently this was once deeply tarnished and then carefully dipped.
- 840 **1869 Proof-60**, cleaned, some of the mirror surfaces remain.
- 841 **1870 Select Brilliant Proof-63**, usual light hairlines visible.
- 842 **1871 Select Brilliant Proof-63**, similar.

- 843 **1872 Choice Brilliant Proof-65**, only the lightest obverse hairlines.
- 844 **1873 No arrows. Select Brilliant Proof-63**, some minor cloudiness on the reverse.

- 845 **1873 With arrows. Select Proof-63**, light steel toning with underlying mirror surfaces and the usual light hairlines. Popular type coin, always in demand, as is the next.

- 852 **1880 Proof-60**, cleaned, retoning. Unnaturally high wire rims on both sides.

- 846 **1874 Arrows. Proof-60**, cleaned, cloudy with hairlines.

- 853 **1881 Select Brilliant Proof-63**. Lightest hairlines, and a nick in the field near the left shoulder.

- 847 **1875 Choice Brilliant Proof-65**, only the lightest of hairlines, well scattered.

- 854 **1882 Select Brilliant Proof-63**, very nearly makes the Proof-65 level; only the lightest hairlines.

- 848 **1876 Proof-60**, cleaned, now toned a dullish gray.

- 849 **1877 Select Brilliant Proof-63**, average quality Proof.

- 850 **1878 Proof-60**, cleaned, dull.

- 855 **1883 Select Brilliant Proof-63**, a few tiny obverse planchet chips, probably as made.

- 851 **1879 Select Brilliant Proof-63**, very close to the gem level with only the normal light scattered hairlines; these would not even be mentioned by less meticulous cataloguers. Always popular due to the low mintage for business strikes; the same can be said about all of these through 1890.

- 856 **1884 Choice Brilliant Proof-65**, choice surfaces.

857 1885 Proof-60, not in full brilliance, once cleaned.

858 1886 Select Brilliant Proof-63, usual light hairlines.

859 1887 Select Brilliant Proof-63, light hairlines, short scratch from left shoulder to rim.

860 1888 Select Brilliant Proof-63, a little cloudy.

861 1889 Select Brilliant Proof-63, light hairlines, faint scrape between pole and head.

862 1890 Brilliant Proof-63.

863 1891 Select Brilliant Proof-63, similar to the last few.

864 1892 Barber. Select Brilliant Proof-63, very light hairlines. Lightly toned near the rims.

865 1893 Choice Brilliant Proof-65, a glittering jewel.

866 1894 Choice Brilliant Proof-65, normal weak strike at lower part of right wing.

867 1895 Proof-60, obverse cleaned and now dull; reverse much nicer.

868 1896 Choice Brilliant Proof-65, only microscopic scattered hairlines.

869 1897 Choice Brilliant Proof-65, another choice piece.

870 1898 Select Brilliant Proof-63, normal light scattered hairlines.

871 **1899 Select Brilliant Proof-63.** The hairlines are microscopic and the piece is close to the Proof-65 level.

872 **1900 Choice Brilliant Proof-65,** few microscopic hairlines on obverse device but the fields are lovely.

873 **1901 Select Brilliant Proof-63,** few faint scratches on obverse device.

874 **1902 Choice Brilliant Proof-65,** one or two very faint hairlines on cheek which will never be mentioned again.

875 **1903 Choice Brilliant Proof-65,** just about perfect. An excellent type coin.

876 **1904 Choice Brilliant Proof-65,** light tarnish at the rims.

877 **1905 Choice Brilliant Proof-65,** few faint obverse hairlines well scattered.

878 **1906 Choice Brilliant Proof-65,** very similar.

879 **1907 Select Brilliant Proof-63,** few minor scuff marks in right obverse field, otherwise as nice as the previous two.

## Silver Dollars

880 **1795 Flowing hair.** Bolender-6, three leaves. Scarce variety. **Strict Fine-12,** unusually pleasing for the grade with a steel gray tone that has a hint of iridescence in it. Sure to be resold as "VF" with some justification.

- 881 1796 B-4. Small date, dot above 1, 15 stars; small eagle reverse with large letters. **Choice VF-30**, lovely iridescence with gray devices, blue-green fields and flashes of gold and russet around stars and letters. The only defect is an old planchet dig on reverse after D of UNITED, and we don't find this to be too distracting. A premium small eagle bust dollar, and certainly equal to most that change hands as EF.

(See Color Photo)

- 882 1797 B-2 (R-6). Stars arranged 9 left, 7 right; small letters on reverse, from a die made in 1795. **Choice VF-30**, minutely less sharp than last, mottled, though attractive obverse toning, mostly in shades of grayish violet and green-gold; reverse a duller steel gray but with flashes of iridescence near the borders. Unusually sharp detail on the reverse for this variety, which is nearly always weak. What appears to be rim damage above TES is really the combination of an irregularity in the original planchet and a minute edge test mark. Just 342 pieces thought to have been struck, the Feb. 28, 1797 delivery. Rarest by far of the three 1797 varieties, unknown in Unc. and essentially unobtainable above EF. The 1975 ANA piece and Garrett 684 are the two finest offered in recent years, and both of them are only slightly sharper than the present piece. In our Seller auction last year we offered an unprecedented 4 pieces, but all were well below the quality of this one.

- 883 1798 B-2 (15 stars on obverse; **small eagle reverse** with small letters). **Choice VF-30**, attractively toned, tarnish spot before face. Reverse weaker than obverse, as always. Another choice small eagle bust dollar, a type that should prove to be an excellent investment in the years ahead, just as it always has. Genuine rarity always pays off.

*Note: Probably the first variety struck for the year; these probably included in the first 9000 pieces delivered January 18, though only making up a small fraction of that total. The obverse die has 15 stars proving it was made before June, 1796 when Tennessee became the 16th state. Since there is no trace of any overdate, it is likely that the date was either left blank, or only the first three digits were punched in.*

*The reverse is a carryover die from 1797 B-2 and was used here briefly despite its worn condition (it was originally a 1795 die and was actually used on B-14 of that year). Evidently the coining department was still waiting for the new heraldic eagle reverse dies, which would have taken longer to make than usual because new hubs had to be made. There would seem to be no other explanation for using an old reverse die that should have retired in 1797.*

- 884 1798 B-21. (Wide date, lump above 9; only 10 arrows plus a headless stick). Heraldic eagle type. **Choice VF-30**, medium toning with some scattered reverse tarnish.

- 885 1799 B-10. **Choice EF-45**, mottled blue toning with much underlying mint lustre. Obverse die used earlier on B-11,7,5 in that order, but ground down to remove clash marks.

- 886 1800 B-19 the famous AMERICA! variety. **Choice VF-30**, attractive light violet-gray and greenish toning, enough lustre at rims to suggest EF, but there is simply too much wear on the hair curls and bust to justify that grade. Old dull obverse scrape at top, otherwise defect-free.

- 887 1801 B-1 (wide date, spaced 1 8 01; late bulge at MER). VF-20, deep attractive iridescent toning.

888 **1802 B-6** (right foot of T in LIBERTY gone; reverse of 1803, B-6). **Choice EF-45**, gorgeous russet gray and green toning, couple of tarnish streaks on the obverse which were evidently in the original planchet, and one should *not* try to remove them.

889 **1803 B-6**. VF-20, original iridescence, but some graffiti in obverse fields.

890 **1840 Seated**. EF-40, irregularly toned in various shades of gray.

891 **1841** VF-20, original blue-gray toning.

892 **1842** VF-20, toned.

893 **1843** EF-40, blue toning, some lustre.

894 **1844** VF-20, sea-green toning.

895 **1845** Choice VF-30, green and gray toning, and traces of prooflike lustre.

896 **1846** EF-40, rose and gold-green iridescence.

897 **1847** EF-40, light gray, initials scratched in right obverse field.

898 **1848** EF-40, medium iridescent gray, light reverse rim bump.

899 **1849 AU-50**, gorgeous green and pink iridescence on obverse; reverse a more subdued gunmetal gray with hints of blue. Scarce and underrated date in high grade; we can't remember the last time we handled a full Uncirculated of this date.

900 **1850-O** EF-40, deep iridescent toning, light tarnish.

901 **1853** Choice EF-45, deep russet and green toning.

902 **1854** EF-40, attractive pink and blue iridescence, but this has been scratched up in the right obverse field. Rare, only 33,140 struck.

903 **1855 AU-50, prooflike**, light gray toning. Only 26,000 pieces struck and most of the survivors are either worn or damaged. The true rarity of Liberty seated dollars in the 1850s is seldom recognized.

904 **1856** EF-40, irregular gray toning with splashes of gold tarnish.

905 **1857 Prooflike Choice AU-55**, light green and pink toning, really attractive. Another good coin, and a solid investment for the future.

(See Color Photo)

906 **1871 Select Brilliant Proof-63**, few faint scattered hairlines, scratches and spots, but really, these are all microscopic and the piece is very lovely with full mirror surfaces.

(See Color Photo)

907 **1872 Select Brilliant Proof-63**, few light hairlines but basically as nice as they come.

(See Color Photo)

- 908 **1873 Select Brilliant Proof-63**, hairlines a little more obvious on this one, but still an average or better proof for the date.

(See Color Photo)

- 912 **1881 Choice Brilliant Proof-65**, a gorgeous coin. Couple of faint planchet chips on reverse, otherwise nearly perfect. Silver dollar proofs are very rare in gem condition, and don't let anyone tell you otherwise. Several hundred of each date were originally struck, but subtract the number lost or put into circulation over the years, plus the vast numbers of proofs ruined by scratches, heavy cleaning, heavy tarnish and resultant corrosion and all sorts of other calamities, and one can begin to understand the rarity of truly choice pieces. For example the present coin has probably fewer than 100 equals among the original mintage.

(See Color Photo)

- 909 **1878 Morgan type**. First type with eight tailfeathers. **Select Brilliant Proof-63**, light hairlines and a few faint scratches at the top of the reverse.

- 913 **1882 Choice Brilliant Proof-65**, another choice piece.

- 910 **1879 Proof-60**, cleaned and partly cloudy, but the surfaces have plenty of reflectivity left.

(See Color Photo)

- 914 **1883 Select Brilliant Proof-63**, just a few too many hairlines on the obverse, but far above average for these large coins. The difference between a coin like this and a full Proof-65 is mainly microscopic; the coins we list here as Proof-63 look like gems unless the piece is closely scrutinized by trained eyes.

(See Color Photo)

- 911 **1880 Select Brilliant Proof-63**, few faint hairlines, well scattered.

- 915 **1884 Brilliant Proof-60**, cleaned but nearly full brilliance remains.

(See Color Photo)

- 916 **1885 Select Brilliant Proof-63**, normal hairlines and about the average quality proof.

(See Color Photo)

- 920 **1901 Select Brilliant Proof-63**, faintest hairlines, nick in left obverse field. In tremendous demand because of the rarity of gem business strikes.

- 917 **1886 Brilliant Proof-60**, like the 1884.

(See Color Photo)

- 921 **1902 Choice Brilliant Proof-65**, a fantastic coin!

(See Color Photo)

- 918 **Choice 1899 Brilliant Proof-65**, faint hairlines in left obverse field.

(See Color Photo)

- 922 **1903 Choice Brilliant Proof-65**, not quite as nice as the last, but still far above average.

(See Color Photo)

- 919 **1900 Select Brilliant Proof-63**, few too many reverse hairlines.

(See Color Photo)

- 923 **1904 Choice Brilliant Proof-65**. Last of this splendid offering.

- 924 **1921 Morgan. MS-60, Brilliant Uncirculated**. A coin added to the collection later, probably by someone in the Springfield Coin Club.

out in some of the protected areas, and the reverse has much lustre. Rare grade for this rare date.

Just 1,781 pieces struck with a single pair of dies, of which possibly 75 pieces survive today, many of them polished or damaged in some way. Stars are arranged 7 left, 6 right for the first time and the obverse device is positioned differently than in earlier years. The word LIBERTY is placed closer to the rim with L closer to the top of the cap than before. This reverse die was softened and overpunched with a 6, and actually used on 1806 quarter eagles. The reverse die was also used in 1806 and again in 1807.

- 939 1878 Quarter eagle. MS-60, Brilliant Uncirculated, prooflike on the obverse.

- 940 1798 Half eagle. Large 8 in date; heraldic eagle with 13 stars on reverse. VF-20, once harshly cleaned, now toned back. First use of Scott's long-necked heraldic eagle punch.

(See Color Photo)

- 941 1799 Half eagle. Large 9 in date, which is recut; small stars on reverse which are misshapen, 5 berries. AU-50, natural coppery toning, flashes of prooflike lustre, clean surfaces and rims. Reverse die cracked in half diagonally from final S down to star, eagle, scroll, and arrows, and out through N.

(See Color Photo)

- 942 1800 Half eagle. EF-40, reverse stronger than obverse, light original toning near rims, much lustre, especially on the reverse. M in AMERICA started too far right, then corrected (Breen says it is over a larger M, but that doesn't appear to be the case to us). Heavy rim breaks over NIT and STA which should not be confused with rim damage by the amateur.

(See Color Photo)

- 943 1803/2 Half eagle. EF-40, very similar to the 1800, reverse again stronger than obverse, same old toning, much lustre. Blunt 1 in date, bold overdate, all T's with missing right feet (the result of a T punch that chipped).

(See Color Photo)

- 933 1881 Choice Brilliant Proof-65, a gorgeous coin. A few microscopic hairlines scattered, but far above average.

(See Color Photo)

- 934 1882 Select Brilliant Proof-63, nearly equal to the 1881, but a few too many hairlines in right obverse field.

(See Color Photo)

- 935 1883 Choice Brilliant Proof-65, just starting to tone, light scattered hairlines.

### Rare 1805 Quarter Eagle

(See Color Photo)

- 938 1805 Quarter eagle. Stars arranged 7 left, 6 right, small 5 in date; 5 berries, 3 of them stemless. EF-40, lustrous, signs of an old cleaning on the obverse, but traces of the original prooflike surface can be made

(See Color Photo)

- 944 **1807 Half eagle. Bust right style. Choice EF-45**, light russet toning, much lustre, reverse sharper than obverse, as usual for this design. Large date with 1 and 0 both recut; large reverse stars, AME solidly joined at bases.

- 945 **1811 Half eagle. Capped bust type. VF-20**, light toning, some traces of lustre. Large 5 in 5D, as in 1810. A relatively inexpensive example of a pre-1834 U.S. gold coin.

- 946 **1881 Half eagle. MS-60.**

## Various U.S. Items

(See Color Photo)

- 947 **1893 Isabella quarter. MS-65, Choice Uncirculated, choice toned beauty** with rich russet-gold deepening to midnight blue at the rims. Full underlying mint lustre. Finest we have handled in many a moon; will bring a runaway price to some perfectionist.

- 948 **1892 Columbian half dollar. MS-65, Choice Uncirculated**, beautiful gray-blue toning, spot on obverse rim.

- 949 **1893 Columbian. MS-60, Uncirculated**, blue toning.

## Choice 1900 Lafayette Dollar

(See Color Photo)

- 950 **1900 Lafayette dollar. MS-65, Choice Uncirculated**, natural silvery gray toning with mottled splashes of gold and blue-green tarnish near borders. Excellent frosty surfaces with only the faintest contact marks on Washington's jaw (most purported Uncirculateds of this issue have

the entire cheek nicked and rubbed up). Outclasses anything we have handled in some time; we've seen a couple of equal or even finer pieces at recent coin shows, but these were priced at astronomical levels by their dealer-owners.

- 951 **Pair of pattern cents**, both dated 1854. J-161 (restrike with cracked dies) and J-163. Both EF-40 and toned, some nicks on the J-161. (Total: 2 pieces)

- 952 **1863 Pattern cent. J-299**. Regular dies without L on ribbon but struck on a bronze planchet, as in 1864; giving it the status of a transitional. Dies aligned medal fashion (upset 180 degrees from regular coin alignment). Proof-60, tan and violet toning, darker on reverse. Popular issue.

- 953 **1868 Pattern cent. J-608**. Struck in nickel. **Brilliant Proof-60**, seldom found better.

- 954 **1869 Pattern three-cent. J-676**, nickel. **Select Brilliant Proof-63**, minor cloudiness on reverse; fully brilliant and choice on the obverse.

- 955 **1866 Pattern five-cent. J-470**. Bust of Washington, IN GOD WE TRUST above; short 5 within wreath. **Proof-60** with some normal light oxidation and tarnish.

- 956 **1868 Pattern five-cent. Judd-633**. Struck in nickel. The famous design with the Maltese cross at the top of the wreath. **Proof-60**, mostly brilliant, average quality or better for this one.

## 1804 Half Eagle Restrike in Tin

(See Color Photo)

- 957 **1804 Half eagle. Restrike.** White metal, apparently almost pure tin. Plain edge. Listed in Judd as J-32, not over a dozen known. Difficult to grade, this is unworn, but a combination of imperfect striking from worn, rusted and broken dies, and the normal oxidation of the tin metal weakens some details. Flashes of brilliance in the protected areas. An overall grade of **About Uncirculated** would seem to us to be conservative enough.

*Note:* Judd lists this in the regular pattern section, but it should clearly be moved to Appendix C of that reference, since the piece was obviously struck outside of the mint and cannot be called a pattern by even the wildest stretch of the imagination. Taxay lists it properly as a private restrike (see page 300, 1976 edition of Scott's) with the note: "Obverse an unknown die, possibly of 1807 as it has very small stars; Rev. a regular die. Rusted and cracked dies.... All the impressions from these dies are attributed to Joseph J. Mickley. Their first record [for one of the silver impressions] appears in the sale of the Colburn collection, Oct. 20, 1863..... [The white metal impressions] were first recorded in Bowdoin sale, Mar. 31, 1879. It was said to have been struck by Mickley in or shortly before 1878." Walter Breen, in his half eagle monograph (Hewitt Bros.) says that the obverse die was actually used on regular 1804 half eagles (his obverse 3) and was handcut to strengthen certain details outside of the mint. However this attribution is incorrect as the die characteristics of the present piece do not match those for obverse 3. The restrike die is heavily broken vertically from L down to lower rim just right of 4 in date; another crack branches off from this one and ends at the fifth star; Breen's mention of the same crack on variety 3-F is almost certainly an error. Also note the heavy thick center dot on the obverse.

Several obverse and reverse dies of this denomination were discarded by the mint in cracked and rusted condition and sold as scrap (for the life of us, we cannot imagine the mint doing such a thing with undefaced dies that had been previously used to strike genuine U.S. gold coins; it is a wonder the dies did not end up in the hands of enterprising counterfeiters). As it turned out, the dies wound up in the hands of numismatists instead, who muled them together in various combinations and used them to make restrikes for sale to private collectors, but who were careful not to use gold planchets, in respect for the counterfeiting laws. Instead half eagles dated 1803, 1804, 1805, and 1808 are known in various die combinations and in metals such as silver, tin, and copper, with reeded or unreeded edges. The best reference on these curious productions is Taxay, page 300.

- 958 **1847 Hawaiian cent.** Bust of Kamehameha III. Plain 4 in date; berries arranged 6 left, 7 right. VF, but dark and dull, and with a few rim nicks.

## Splendid Choice Set of 1883 Kalakaua Silver Coins

(See Color Photo)

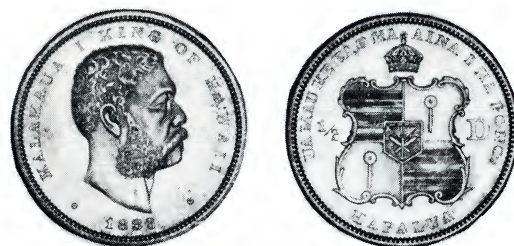

- 959 **1883 Hawaiian dime.** Bust of David Kalakaua. **Choice Uncirculated**, original blue, pink and gold tones over full lustre. Some normal contact marks in obverse fields concealed by the lovely colors. One of the finest we have seen of this denomination, which is common in VG or Fine but is prohibitively rare this choice. Listed in the Medcalf and Russell reference at only \$650 in Uncirculated, but recent sales records have been at least double to triple that figure.

(See Color Photo)

- 960 **1883 Hawaiian quarter.** Lightly toned Uncirculated gem, the colors tending toward olive-gold with a faint pastel background. Pristine, never dipped or cleaned. Head, shoulders, and chest above the usual brilliant bagmarked pieces from the hoard. Could realize well into four figures.

*Note:* The variety with the recutting inside the first 8 of the date, called 8 over 3 by Medcalf and Russell. The 3 of the date, with its curious forked center stroke, is from the identical punch earlier used on the U.S. \$4 gold stellars. 500,000 of this denomination struck but at least 257,400 were redeemed and melted. Most common of the four 1883 Hawaiian coins in Uncirculated condition, due to the dispersal of a hoard of at least two rolls many years ago; as mentioned above, these are mostly well-bagmarked pieces, and nowhere near the quality of the present example.

(See Color Photo)

- 961 **1883 Hawaiian half dollar.** Uncirculated gem, beautiful iridescent pastels. Faint rub on Kalakaua's cheek, otherwise just about perfect. Seldom seen or offered for sale in anything close to this quality. Many times rarer in all grades than the quarter, and really rare this choice. 700,000 minted but 612,245 of them were redeemed and later melted under an act of Congress approved by President Theodore Roosevelt on January 14, 1903. This splendid prize could sell for \$2000 or more.

(See Color Photo)

- 962 **1883 Hawaiian silver dollar.** Uncirculated, dark mottled, but attractive toning, mostly blue and greenish-gold in fields with the bust of Kalakaua a beautiful pinkish-gray. Few minute rubs on cheek-bone and eyebrow, but really choice. Medcalf and Russell's \$2500 Uncirculated price is much too low. Really rare like this; many times more so than, say an 1893-S Morgan dollar. This beauty could make the five-figure level. A coin to really get excited about!

*Note:* The 1883 Hawaiian coins were designed by Charles Barber of the Philadelphia mint. The dies were made in that facility, but the actual striking took place in the San Francisco mint, even though the pieces do not bear an S mintmark. The coins are of the same weight and fineness as their U.S. counterparts, an obviously convenient situation, since then regular planchets could be used. The hubs from which the dies were made are still preserved in the Philadelphia mint; as for the dies themselves, Medcalf and Russell tell us several defaced obverse dies still exist and are stored in the Hawaii State Archives in Honolulu.

- 978 1773 Virginia halfpenny. No period; 7 harpstrings. VF, dark glossy brown, a pleasing example.
- 979 Nova Constellatio coppers: 1783 Blunt rays and 1785 Pointed rays. Both Fine condition with some light porosity on the 1783. (Total: 2 pieces)
- 980 1785 Nova Constellatio copper. Pointed rays. Crosby 5-E, one of the rarest of the varieties. Fine or better, clean and attractive coin.
- 981 1787 Massachusetts half cent. Strong Very Fine with charcoal gray surfaces.

- 982 1787 Connecticut copper. Miller 4-L, the horned bust, but from the extremely rare early die state with the break that gives this variety its name only a tiny dot in the field. Very Fine, steel and olive toning.

- 983 1787 Connecticut copper. Miller 32.5-aa, the famous FNDE reverse. Fine, medium to dark brown, nice for the grade, and seldom seen better. A blundered die; the engraver thought he was working on a Fugio cent and punched the first two letters FU into the die before realizing his mistake. An historic issue.
- 984 1787 Nova Eborac. Figure faces left on reverse. A perfect VG, weak at rims as always, but nice surfaces with none of the digs and planchet defects that typically afflict these. Scarce, still very much underrated; at least a hundred times rarer than New Jersey or Connecticut coppers.
- 985 1787 New Jersey copper. Maris 63-q. Morristown issue. Fine or better, smooth surfaces and attractive color. Wide planchet style.

- 986 1776 Machin's Mills halfpenny. Vlack 6-76A. Fine or so for the coin, light defects at rim. Actually struck 1787 or later; deliberately backdated to 1776 even though no genuine Tower Mint halfpence were struck in or after 1776, a fact unknown to the American coiners of this curious piece. Long popular because of the 1776 date, and the fact that it was unknown to Vlack when he made up his original 1964 plate.
- 987 1788 Vermont copper. AG; also a 1786 N.J. cent, VG but porous, and a Kentucky token also VG. (Total: 3 pieces)

- 1192 **1875-S Brilliant Proof-60**, lightly cleaned with hairlines and a few faint field nicks. Matches the die characteristics on the other known proofs (see the Breen book), has wide border and a partial wire rim. However, lacks the proof surfaces within the hollows of the wings as seen on our ANA coin and on the photo of the coin in Breen. This is the Joseph F. Eisel piece, one of the ones listed in Breen. Extremely rare, not over 12 known, and likely to attract attention.

## Half Dollars

- 1224 1806 O-109. Pointed 6; no stem through claw. Choice VF-30, bluish gray toning. Common variety, but popular because of the blundered reverse.

- 1225 1806 Another O-109. VF-20, sharp, but cleaned.

- 1226 1808/7 O-101. Choice AU-55, natural light silvery brilliance over lustrous surfaces, not fully struck, but then this variety never is. Late cracked die state. As nice as normally obtainable; true Uncs are very rare.

- 1227 1809 So-called IIII edge. AU-50, mottled gold and blue-gray tones, much lustre, usual strike. In our opinion the lines on the edge do not represent an experimental edge design but are perhaps only repairs to a damaged edge die.

- 1228 1813 50C/UNI, O-101. EF-40, bluish gray toning. Scarce variety and lately very popular with several auction records between \$400 and \$500 for comparable pieces.
- 1229 1813 50C/UNI, O-101. VF-20, dark blue-gray toning, free of defects.
- 1230 1814/3 Overdate. O-101. EF-40, better than average strike, deep iridescent toning, and attractive. These early overdates are quite scarce in EF and up and are beginning to receive the attention they deserve.
- 1231 1817 Punctuated date: 181.7. O-103. EF-40, light gray, soft strike, traces of lustre. Punctuation mark between 1 and 7 of date as sharp as it ever comes; reverse is the same die used on the extremely rare 1817/4 overdate (the famous AMERJCA reverse). Seldom offered.

- 1232 1821 O-107, the wide date (R-5). AU-50, light gold toning, much brilliant lustre. Rarest of the 1821 varieties and a naked eye type coin because of the wide date (the other five obverses all have a close date).
- 1233 1822/1 O-101. VF-20, serif of the underlying 1 as clear as it ever is at the top curve of the 2. Rare.
- 1234 1822/1 O-101. VF-20, minutely sharper than the preceding, but with a small dig at the final S in STATES. We can't remember the last time two of these were offered in the same sale!
- 1235 1822 Buttoned cap, 1826 fancy 2, 1827 square base 2. All EF-40; the 1822 has been harshly cleaned. (Total: 3 pieces)

- 1236 1823 O-101, the famous broken 3. EF-40, light gray toning, traces of lustre. Rare, and the genuine variety is seldom offered; many offered as the broken 3 turn out to be nothing of the kind when examined; note that the 3 leans sharply right, as on no other variety.
- 1237 1823 O-102. Patched 3. EF-40, dark toning, few tiny marks. Same obverse die as last with the broken 3 strengthened in the die. Both of these are quite interesting.

- 1238 1827/6 O-101. EF-40, light gray toning. Another scarce variety, seldom offered.
- 1239 1827/6 O-102. EF-40, blue-gray toning, light tarnish on obverse. Same obverse die as last; different reverse. Likewise very scarce.
- 1240 1827 Square base 2 and 1828 Curl base 2, no knob, large 8's. Both EF-40, light toning. (Total: 2 pieces)
- 1241 1827 Curl base 2, O-146. VF-20, light toning, very scarce.
- 1242 1828 O-107. Curled base, knobbed 2 (scarce). EF-40, gray toning. A former R-7 variety, with most of the ones that bring this down to R-3 being discoveries of the past 10 years; most of them much worn.
- 1243 1828 O-107, curled base, knobbed 2, another. EF-40, light toning, faint signs of an old cleaning, but about equal to the preceding.
- 1244 1829/7 O-101. EF-40, light toning. Another scarce and popular variety.
- 1245 1830, 1831, 1832, 1833, 1834, 1836. VF-20 to EF-40, two of them cleaned. (Total: 6 pieces)

- 1251 1879 Brilliant Proof-60, similar.
- 1252 1879 AU-50, brilliant, prooflike.
- 1253 1883 AU-50, highly lustrous, a definite business strike and rare as such.
- 1254 1888 Choice AU-55, frosty lustre, and a definite business strike. Rare.

- 1255 1895-S MS-60, Brilliant Uncirculated, nice lustre but faint slide marks across the obverse.
- 1256 1900 Choice EF-45, much lustre, particularly on the reverse.
- 1257 1904 Choice AU-55, full frosty mint lustre.
- 1258 1904-O Choice EF-45, with the lustrous reverse more like AU.

1259 1914-S Choice EF-45, similar, the reverse has claims to AU.

1260 1916 Walking Liberty type. MS-65, Choice Uncirculated, lightly iridescent and very desirable.

## Colonials

### Rare and Historic Massachusetts NE Shilling

- 1703 (1652) **Massachusetts Bay Colony. NE shilling. Noe-III-C. Fine overall**, with the XII mostly well-defined; the NE monogram only partly so. Medium gray toning, free of defects, and guaranteed genuine. Struck between June 11 and October 19, 1652, at which point the design was changed to the willow tree format. Most historic of all colonial coins, as these were the first silver coins struck within the territory of what is now the United States. Very rare, less than 70 survivors known of all six varieties combined, of which this is the most "common". Purchased from us (RCR No. 16, 1972) for \$5950, should realize double or more today.

- 1704 **1652 Massachusetts pine tree sixpence. Noe-33.** Overall Fine, some weaknesses as illustrated, and mostly as struck. Obverse off-center, as nearly always towards 12:00. Contemporary with the large size shillings (1667-69) but about ten times rarer.
- 1705 Trio of Connecticut coppers: (1) 1787 Laughing head; (2) 1787 Muttonhead; (3) 1787 Mailed bust left. Good-VG condition. (Total: 3 pieces)

- 1706 1786 New Jersey copper. Maris 24-P. Strict Very Fine, gray-brown glossy surfaces. Struck from severely injured and bulged dies, late rim break at RE.
- 1707 Pair of Vermont state coppers: (1) 1786 Bust left, RR-11. Good, but dark and porous; (2) 1787 Britannia variety. Fine, clipped at bottom. Reverse unusually bold with nearly the full inscription. Somewhat marred by several reverse scratches, but still far above average in sharpness. (Total: 2 pieces)

- 1708 **1783 Washington draped bust cent. Restrike of 1860 in silver.** Normal center-engrailed edge. Usual dies (7 in date and O in

WASHINGTON boldly double-punched). **Proof**, mostly brilliant with scattered traces of gold tones at borders, signs of light hairlines, but mostly choice, and about equal to the one in our June sale. Advanced die state with rust pits on both sides and a crack along reverse border at right. Worthy of a four figure bid.

- 1709 1783 Washington UNITY STATES cent. Very Fine, medium glossy brown. Above average for these.
- 1710 "1774" Bungtown copper. CLAUDIUS ROMANUS. Good condition.

## Half Cents

- 1711 1828 13 stars and 1833. Both MS-60, Uncirculated, dipped years ago and now retoning. (Total: 2 pieces)
- 1712 1857 MS-60, part mint red Uncirculated. Stain on reverse over STA. Popular last year of issue.

## Large Cents

- 1713 **1793 Wreath type.** Sharpness of VG-8 or better, but dark and very porous and rough and with many edge dents.

- 1714 **1794 S-26.** Divided date (17 94); spur from left curve of O(F), crack through E in STATES. VF-20, bold, charcoal and steel, microscopically porous but very attractive. Ex Jack Collins, via our Fairfield sale, Lot 702.

- 1715 **1794 S-46** (faint crack in bust parallel to pole; cracked across E in CENT) VF-20, medium to dark gray-brown, light porosity, no defects and as pleasing for the grade as you are likely to find.

- 1716 **1808 Classic head type. S-278.** Difficult to grade, the surfaces are

flawless and full of subdued lustre, suggesting AU, but this is very softly struck in the center of the obverse. Little in the way of real circulation, and probably AU from the view of actual wear received. Should be examined.

- 1717 1817 N-16, the famous 15 star obverse. EF-40, lustrous dark brown, and would grade higher except for the generally weak strike, and the presence of a few marks on the obverse rim. Curious and distinctive, the most spectacular blundered die among the late date cents.
- 1718 1817 13 stars, close date. Also 1834 Large 8, small stars, large letters. Both AU-50, the 1817 dark chocolate, the 1834 a little lighter, but duller. Both Ex W.W. Neil Collection (Mehl), later in our Schreeder sale (April, 1979). (Total: 2 pieces)
- 1719 1853 MS-60, light brown and sea-green Uncirculated with a couple of small stains.

1772 1864 2C piece. Large motto. MS-63, streaky gold and violet Select Uncirculated.

- 1773 **1864 2C piece. Large motto.** Doubled date, 18 punched over high 18 (the variety often referred to as 18 over smaller 18, but we believe this attribution is a mistake). **MS-63**, gold-violet toned Select Uncirculated, a little streaky but quite attractive. Partial wire rims and squared edges.

2415 **1906 So-called 1906/5 overdate.** Chip of metal inside loop of 6; knob joined to loop. Taxay lists this as "1906/5 Borderline R-8. The overdate is not distinct." However it seems to us that the chip of metal inside the loop of the 6 is curving the wrong way to be part of an underlying 5. We therefore feel this is a die chip and not a true overdate. Certain specialists may disagree, and the coin should be viewed. MS-60, Brilliant Uncirculated.

2416 1909-D MS-60, Brilliant Uncirculated.

## U.S. Currency and Obsolete Paper Money

The following lots of paper currency are varied, with some scarce issues, plus some nice groupings for collectors. U.S. Paper Currency is listed by *Paper Money of the United States* by Robert Friedberg, 10th edition and obsolete from specialized listings by Criswell and Freeman.

2469 1862 Legal tender \$1 F-16. Certainly one of the few readily obtainable Civil War period notes, signed Chittenden and Spinner. Very Fine, but pressed with one pinhole.

2470 1886 Silver certificate \$1 F-215. Well known Martha Washington note. Only Fine due to 4 minor vertical folds — attractive.

2471 1886 Silver certificate \$1 F-219. Similar to preceding but large brown seal, Rosecrans-Huston. About Uncirculated, but few handling marks.

2472 1896 Silver certificate \$1 F-224. Tillman-Morgan. The beautiful and famous "Educational" design. In Choice About Uncirculated, attractive note and exceedingly popular.

2473 1899 Silver certificate \$1 F-226A. Lyons and Roberts. Choice Gem New — the ultimate condition.

2474 1899 Silver Certificates \$1 Group of 5 different Friedberg numbers, all similar condition (1) F-226 About Uncirculated; washed and pressed; (2) F-228 About Uncirculated but handling marks; (3) F-229 Choice New but aging and handling marks; (4) F-230 About Uncirculated, but starched; (5) F-232 About Uncirculated, but starched. (Total: 5 pieces)

2475 1899 Silver certificates \$1. Group of 4 different Friedberg numbers, all similar conditions (1) F-233 — About Uncirculated, washed and pressed; (2) F-234 About Uncirculated, washed and pressed; (3) F-235 About Uncirculated, but washed and pressed; (4) F-236 About Uncirculated, but washed, pressed and starched. (Total: 4 notes)

2476 1923 Silver certificate \$1 group of all three of the 1923 issues. (1) F-237 Speelman-White, About Uncirculated; (2) F-238 Woods-White, New; (3) F-239 Woods-Tates, Choice New. (Total: 3 pieces)

2477 1886 Silver certificate \$2 F-242, Rosecrans-Hyatt with large red seal. Popular design with lovely appearance. New but washed and pressed.

2478 1899 Silver certificate \$2 F-253, Napier-McClung. Nice, Extremely Fine.

2479 Hawaii and African Invasion World War II emergency issues. (1) 1935 A silver certificate, \$1 F-2300 Hawaii overprint Gem Crisp New; (2) 1935A Silver certificate \$1 F-2306, yellow seal for African invasion Gem Crisp New; (3) 1934A Silver certificate, yellow seal \$5 F-2307 Gem Crisp New (4) 1934A Silver certificate, yellow seal \$10 F-2309 Gem Crisp New.

These five emergency issues of regular U.S. currency have a most unique background. In 1942, after Pearl Harbor, there was widespread fear of enemy occupation of Hawaii. There was a full official withdrawal of all United States regular currency notes by August 1942. These were burned in the Islands on Oahu in a sugar mill furnace at Aiea. They were replaced by regular U.S. notes overprinted with "Hawaii" in large letters in black. The seal and serial numbers were printed in brown. After August 15, 1942, it was illegal to possess, without a license, the regular U.S. notes. Had the Islands been invaded by the enemy, the special government issue would have been declared invalid. These notes were restricted to Hawaii and the South Pacific until October, 1944. Then they were legal to circulate worldwide. In April 1946 the notes were withdrawn and replaced with regular currency.

Likewise, the African invasion notes were printed for the U.S. Landing force — there was fear of disaster, and if so, the yellow seal notes could have been demonitized to prevent German usage. Fortunately neither contingency occurred! Choice group. (Total: 4 pieces)

2480 1934A Federal Reserve Note \$10 F-2303. Hawaii overprint for usage as described in Lot 2479. Crisp Gem New and an asset to any collection.

2481 1935A Silver Certificate \$1 the scarce "R" and "S" pair F-1609 and 1610. These notes were made by the Bureau in early 1944 to see if the experimental "S" paper circulated better than the regular "R". Large red R's and S's were printed on the experimental notes. ## The Mark W. Collet Collection

Dr. Mark W. Collet was a young physician living in downtown Philadelphia in the late 1850s, residing at 329 Broad St.

He was one of the nine original founders of the Numismatic and Antiquarian Society of Philadelphia in late 1857, and was elected the first treasurer from January 1858 to December 1861. Apparently sometime during 1861 Dr. Collet entered the Union Army as a combat officer (not a physician), and in May, 1863, Collet was killed while leading his troops in the battle of Chancellorsville.

Dr. Collet was obviously interested in United States tokens and he was the first listed author on the first publication of the Numismatic and Antiquarian Society published in 1859. It was entitled *Catalogue of American Store Card & C. with space for marking the condition price, rarity, & C. of each piece, designed for the use and convenience of collectors*. The publication is actually undated!

In this collection - in the William C. Tripler Collection he purchased a pattern 1838 50c, a Proof 1c of 1856 and a set of 12 different 1858 cents in a case for \$23.50. This latter 12 piece set was recently discussed in the ANA, 1981 sale, the Rudy Sieck Collection under Lot 7.

This collection of tokens remained in the Collet family until the early 1920s when the last relative, living in Ardmore, Pa. died. All of the coins and related items were sold to a Philadelphia dealer at this time. The tokens were discovered by the present owner in a small cabinet when the collection was being moved in the 1920s, and the dealer sold these to the present owner for a nominal sum. Basically this token collection has remained intact and undistributed with only two owners since the late 1850s.

All of the tokens in the collection, with one exception were manufactured by Scovill & Co., with sales offices in New York, but manufactured in Waterbury, Connecticut. The pieces are all amazingly similar in fabric, Brilliant Uncirculated, prooflike strikes. The original tokens shown in this group were all made from about 1850 to 1855. Since these were obviously bought before 1860, it is not proper to call them restrikes. However, it is readily apparent that these are special striking — almost in the category of specimen striking. It is the writer's opinion (G. J. Fuld) that these Scovill issues offered in the following lots are collector's special strikes — undoubtedly sold directly to collectors through the New York office of Scovill.

It should be emphasized that every single coin offered in the Collet Collection is **Choice prooflike Uncirculated**. The copper are fully brilliant with virtually no toning and the brass are with full original gilt and no toning. The silvered pieces are lustrous, but most have light silver-like toning.

Amazingly enough there are eleven completely unlisted metal variations, not in Adams "U.S. Store Cards" 1920, or Miller "U.S. Store Card Tokens" 1962.

The specific tokens that were unlisted are shown below, with pseudo-Adams-Miller numbers to keep them in order.

1. N. C. Folger, Adams La. 11A Brass, reeded edge.
2. Same issuer Adams La. 18A Brass, reeded edge.
3. Same issuer Adams La. 18B Copper, plain edge.

10. M.A. Root & Co. Phila. Adams Pa 436A Copper-reeded edge.
11. Francisco & Co. Nashville Adams Tenn. 11A, copper-reeded edge.

In the group that follows each company or two companies are listed as a lot. A special lot is given at the end — if a bid 5% or more over the single lot bids is received, it will be sold as a single lot — otherwise total lot bids apply.

Conditions will not be repeated for each lot — all are prooflike Uncirculated. Silvered are all plain edge (always) and toned, all brass are reeded edge and copper is usually plain edge with few reeded.

### Dr. Collet's Books

- 2580 Very early U.S. auction catalogues with the bookplate of Dr. Mark W. Collet bound in one contemporary volume. The major sale marked on the spine is the Kline sale held by M. Thomas & Sons, June 12 and 13th 1855. It has 1,712 lots and realized \$1753.59 on 92 pages. A 137 lot addenda is bound in the catalogue. All are neatly hand priced and the owner of the sale at this time was "D". A number of lots are indicated as purchased by "D".

Next in the volume is a four page circular by Joseph J. Mickley of July 1858 *Dates of United States Coins and Their Degrees of Rarity*. This very rare pamphlet, although not too useful, is the first publication by one of America's outstanding numismatists.

Next is a single page (printed on both sides) of 37 lots of coins by M. Thomas — undated but pencil priced. Presumably this is the entire coin holding of the very large book sale of Edward D. Ingraham which took place on May 22, 1855.

The fourth sale is a manuscript of large cents sold by sealed bid by E. Cogan on Nov. 1, 1858 — this was covered in detail by Attinelli and is noteworthy as having prices and names (including W.I. Jenks, Mickley, Tripler, Foote etc.). An extremely rare catalogue in near perfect condition.

Fifth — Collection of the coins of Galloway J. Morris, May 17, 1859 by M. Thomas & Sons — this is apparently the 65 unnumbered lots mentioned as sold by Thomas on this date — but the owner is not mentioned in Attinelli or the ANS index. Priced and half-named. Collett bought one coin — the proof Victoria florin.

Sixth — The manuscript collection of Charles B. Foote, Esq. by E. Cogan retailed 7 to 14th March 1859. Must be an extremely rare manuscript — as Attinelli reported typeset reprints of the sale. Fully priced and a couple of names.

Seventh — Auction sale by E. Cogan Nov. 1859, in manuscript form in 183 lots and also reprinted, the Tripler Collection. This is fully priced and named, and about 17 lots bought by Dr. Collett.

Finally there is a manuscript copy of the 47 coin lots sold by M. Thomas on Dec. 8, 1859, fully priced and named.

This remarkable volume of very early auctions, many in manuscript form, represents a unique opportunity for the early auction bibliophile — except for the ANS collection — who owns a set of the six manuscript sales (and some of ANS's may be reprints!!) no other set has been reported!

- 2581 The A.B. Sage sale at Henry Whitmore from Nov. 2-3, 1859 held in New York. 609 lots (plus 2 hand added) — all priced and named. On cover "Priced and Named M.W. Collett/Phila." A few pages water spotted — but fully readable and very fine — paper cover.

- 2582 Proceedings of the Numismatic and Antiquarian Society of Philadelphia. 1910, 1911, and 1912 published 1913. 316 pages. Many references to Dr. Collett. Very Fine, paper covers.

- 2583 Bryan dollar in silver by Tiffany & Co. The Tiffany incuse on the edge seems to measure 8 mm. which indicates a restrike, from 1910, but surfaces of this piece are original. Rare either way. Zerbe-1, H-K-777, Extremely Fine.

- 2584 Large Gorham dollar, Zerbe-5, H-K-780 with plain wheel reverse. About Uncirculated.

- 2585 Large Gorham dollar, Zerbe-5, but engraved neatly in the open areas: V.K. /to/ S.P. FENNER, NOV.—1896. Very unusual inscription. Extremely Fine and scarce.

- 2586 Large Gorham dollar, Zerbe-6, H-K-781. Plain reverse. Very Fine to Extremely Fine.

- 2587 Large Gorham Bryan dollar with a plain reverse. This has been artistically engraved into the largest love token we have ever heard of! The inch-high initials "SNL" are skillfully engraved on the reverse. Listed as Zerbe-6, H-K-781. Silver and Extremely Fine. Very unusual.

- 2588 Large Gorham Bryan dollar, with fully lettered reverse. Zerbe-8, H-K-782. Called rare by Zerbe. About Uncirculated. (In 1924 RARE was not used loosely!)

2589 Gorham Bryan dollar in small size format with reeded edge. Listed as Zerbe-10, H-K-783. In silver, with Extremely Fine. Very rare.

End of Bryan Money

2590 Spaulding & Co. large size silver Bryan dollar, with plain reverse. Listed as Zerbe-15, H-K-786. On the reverse, crudely engraved is "Nov 10/96". The piece is Extremely Fine, but the obverse has numerous minor nicks around the edge of the obverse.

2591 Completely unlisted Bryan 10c Satirical money. Reverse same as Zerbe-31, obverse is similar but "10" in center, instead of ONE/DIME. Cast in type metal or lead. Extremely Fine and undoubtedly very rare.

2592 Large satirical dollar, crudely cast in Babbitt metal. Listed as Zerbe-71. Very Fine to Extremely Fine for token which is crude at best.

2593 Large satirical dollar, 84 mm. Listed as Zerbe-86, cast in type metal. Extremely Fine and called scarce by Zerbe.

2594 Bryan lead satirical dollar, smaller size — only 63 mm. Lead is a rare fabric, grades Extremely Fine with a trace of lead corrosion. Zerbe-113.

2595 Large iron-cast dollar, with head right. Listed as Zerbe-121, and in 1924 when Zerbe was written, only one specimen was known. First we have seen and obviously extremely rare and desirable. Extremely Fine.

- 2603 New Hampshire, Agricultural Society engraved by Charles Parker of the U.S. Mint. Listed as Julian AM-56. ## Phoenix Buttons

The following group of "Phoenix" buttons are included among token lists because of their close association with the Northwest trading activities exemplified by the North West Company tokens. These buttons, manufactured in England were brought to the Northwest about 1832-3. These pieces were all excavated in an Indian village site in northern California. See Rulau *Early American Tokens* p. 27 for more detail. The book is available from Bowers and Ruddy for \$4.95 postpaid.

- 2614 Train woodburning tokens and closely related to transportation tokens. Two interesting articles on woodburners appeared in *The Numismatist* by Clyde Drawing in December 1962, August 1963 and July 1964. This piece is one of the great rarities of the group, Drawing type 6 — M.C.R.R. (Michigan Central R.R.), with 50 below the engine number. On reverse is 1/2 cord. Drawing reports two 1/2 cord pieces in his census — one has an unknown number and maybe the same as this specimen. Called R-9 (two to four known), Brass, Extremely Fine.
